Subject index*

A

Acid, urinary titratable, potential error in measurement, 906
xanthurenic, in urine, fluorometric method for determination, 520

Acidic buffer systems for urea starch-gel electrophoresis, 650

Adenine, nicotinamide, dinucleotide in lactate dehydrogenase assays, control of inhibitory impurities, 144

Adenosine triphosphate content of glucose-6-phosphate dehydrogenase–deficient and normal erythrocytes, including studies of glucose-6-phosphate dehydrogenase–deficient man with "elevated erythrocytic ATP," 726

Airway, Reynolds critical flow in, experimental value of, 43

Albumin, reserve, binding capacity in serum from newborn infants with hyperbilirubinemia, micromethod for measuring, 660

Alpha-2 macroglobulin and trypsin-binding activity, elevation in nephrosis, 559

Aminoaciduria screening by thin-layer high-voltage electrophoresis and chromatography on microplates, 669

Anaphylaxis effect on leukocyte lipids, in vitro, and histamine release from human leukocytes by lysolecithin, 601

Angiotensin-II, effect on radioiodine "clearance" from skin in hypertension, 265

Anthrone method, automatic, for determination of inulin in plasma and urine, 689

Antibiotic therapy in acute pyelonephritis produced by *Escherichia coli*, evaluation, 546

Antihemophilic factor activity in plasma, measurement, 1025
globulin concentrate from cold insoluble fraction of plasma, characterization and data on preparation and clinical trial, 23

Antihypertensive principle, renomedullary, in renal hypertension, 778

Antitrypsin, serum levels, semiquantitative procedure for estimating, 528

Appositional rate of Haversian and endosteal bone formation measured in tetracycline labeled human ribs, 633
of osteoid formation evaluated by tetracycline labeling, 447

Arthritis, gouty, acute, inflammatory process in; presence of Hageman factor and plasma thromboplastin antecedent in synovial fluid, 455
rheumatoid, serum immunoglobulins in, 850

Assay, coated charcoal, unsaturated iron-binding capacity in, 855

ATP, elevated erythrocytic, studies of glucose-6-phosphate dehydrogenase–deficient man with, adenosine triphosphate content of glucose-6-phosphate dehydrogenase–deficient and normal erythrocytes, 726
in tissues, measurement, with use of $C^{14}O_2$ production from glucose-1-C^{14}, 1013

Automatic method for determination of ornithine carbamoyl transferase activity, 154

Azide-methemoglobin method for hemoglobin determination in blood, 116

B

Bacteriuria, correlation of hemagglutinin response with; immunologic studies in urinary tract infections, 13

Barbiturate intoxication, evaluation of diuresis in treatment, 898

Beta-galactosidase and beta-glucuronidase activity in bone marrow and blood cells, method for histochemical demonstration, 709
-glucuronidase and beta-galactosidase activity in bone marrow and blood cells, method for histochemical demonstration, 709

*January, pp. 1-180; February pp. 181-354; March, pp. 355-532; April, pp. 533-712; May pp. 713-890; June, pp. 891-1072.

Bile, human hepatic, bile-specific protein components in, 640
serum and, bilirubin fractions from, nature, 294
separation and quantitative estimation, 282
-specific protein components in human hepatic bile, 640
Bilirubin, formation in normal, damaged, and Gunn rat livers, 817
fractions from serum and bile, nature, 294
separation and quantitative estimation, 282
tritiated, biosynthesis, and studies of excretion, 1000
Binding capacity, maximal, and protein concentration of thyroxine-binding prealbumin in serum, determination, 500
Biochemical properties of human red cell galactose-1-phosphate uridyl transferase (UDP glucose: α-D-galactose-1-phosphate uridyltransferase) from normal and mutant subjects, 947
Biosynthesis of tritiated bilirubin and studies of excretion, 1000
Blood hemoglobin, azide-methemoglobin method for determination, 116
and buffer, difference in apparent pH, caused by raising liquid junction from room temperature to 37.5° C., 516
cells and bone marrow, method for histochemical demonstration of, beta-glucuronidase and beta-galactosidase activity in, 709
human, frequency of endoreduplication in short-term cultures, 610
flow, cerebral and coronary, analysis of nitrous oxide by gas chromatography in measurement of, 678
hemoglobin A_2, quantitative determination, with use of disc electrophoresis, 314
human, studies on preservation, variability in erythrocyte storage characteristics among healthy donors, 955
method for granulocyte removal from, 321
and serum, human, stability of manganese concentrations in, neutron activation analysis, 836
and urine, histamine in, technique for estimation, 1044
Blue dye, Coomassie, spectrophotometric determination of, by direct serum method, 177
Body fluids, detection of ferritin in, specific and sensitive method for, 307
Bone formation, Haversian and endosteal, appositional rate of measured in tetracycline labeled human ribs, 633
Bone formation—Cont'd
rate measurement, in case of familial hypophosphatemic vitamin D–resistant rickets, 973
osteonal, evaluated by tetracycline labeling, 447
marrow and blood cells, method for histochemical demonstration of beta-glucuronidase and beta-galactosidase activity in, 709
Buffer and blood, difference in apparent pH, caused by raising liquid junction from room temperature to 37.5° C., 516
systems, acidic, for urea starch-gel electrophoresis, 650

C

Cantharidin determination in tissues and subcellular location, 98
$C^{14}O_2$ production from glucose-1-C^{14}, measurement of ATP in tissues with use, 1013
Carbon monoxide in respiratory gases, modified chemical analysis for, 873
Catalase activity, human erythrocyte, effect of iron deficiency and red cell age on, 742
Cells, human blood, frequency of endoreduplication in short-term cultures, 610
juxtaglomerular, and zona glomerulosa in cirrhosis, evaluation of indices, 199
red blood, hemolysates, nature of hemoglobin components produced in, 355
Central nervous system stimulation, effect on erythropoiesis in rats with chronically implanted electrodes, 713
Ceruloplasmin and serotonin, study of physiologic interaction between, 934
Chemical analysis of platelets from patients with thrombocytopathy, with reference to phospholipids, 229
Chinese variant of glucose-6-phosphate dehydrogenase, 374
Chloramphenicol, modification of immune nephritis by, 58
Cholesterol-complexing macromolecular fractions, species differences in bile in relation to gallstone formation, 78
Chromatographic analysis, gas, of high molecular weight fatty acid methyl esters with technique of molar response, 87
Chromatography, gas, analysis of nitrous oxide by, in measurement of cerebral and coronary blood flow, 678
and thin-layer high-voltage electrophoresis on microplates, aminoaciduria screening by, 669
separation of thyroid hormones by, and quantitative measurement, 495

Chromium-51 uptake as function of red cell age, 70
Cirrhosis, evaluation of indices of juxtaglomerular cells and zona glomerulosa in, 199
of liver, postheparin plasma lipolytic activity in patients with, 461
Cirrhotic and normal subjects, kinetics of I^{131} rose bengal in, studied by compartmental analysis and digital computer, 983
Closuré, osteon, evaluated by tetracycline labeling in dog rib, radial rate, 447
Coated charcoal assay of unsaturated iron-binding capacity, 855
Cold insoluble fraction of plasma, antihemophilic globulin concentrate from, characterization and data on preparation and trial, 23
Compartmental analysis and digital computer, kinetics of I^{131} rose bengal in normal and cirrhotic subjects studied by, 983
Computer, digital, and compartmental analysis, kinetics of I^{131} rose bengal in normal and cirrhotic subjects studied by, 983
Concentrating mechanism, renal, effect of uremic environment on, 533
Conjugation, sulfobromophthalein-glutathione, effect of steroids on activity of enzyme that catalyzes, 830
spectrophotometric assay of liver enzyme that catalyzes, 863
Coomassie blue dye, spectrophotometric determination by direct serum method, 177
Creatine, plasma, in diabetes mellitus, 473
Critical flow, Reynolds, in human airway, experimental value of, 43
Cultures, short-term, of human blood cells, frequency of endoreduplication in, 610
Cytoplasm, renal tubule, rat and human, distribution of normal serum proteins within, demonstrated by immunofluorescence, 189

D

Dehydrogenase, Chinese variant of glucose-6-phosphate, 374
–deficient, glucose-6-phosphate, and normal erythrocytes, adenosine triphosphate content, including studies of glucose-6-phosphate dehydrogenase–deficient man with "elevated erythrocytic ATP," 726
erythrocytic 6-phosphogluconate, hereditary variation, 255
Dehydrogenase—Cont'd
glucose-6-phosphate, glutathione, erythrocyte reduced, and 6-phosphogluconic dehydrogenase in patients with myelofibrosis, 615
lactate, assays, control of inhibitory impurities in nicotinamide adenine dinucleotide in, 144
isoenzymes, electrophoretic separation of, and evaluation in medicine, 329
6-phosphogluconic, erythrocyte reduced glutathione, glucose-6-phosphate dehydrogenase in patients with myelofibrosis, 615
total lactate, heat-stable lactate dehydrogenase isozyme-1, and hydroxybutyrate dehydrogenase, method for determination, 131
Detection of ferritin in body fluids, specific and sensitive method for, 307
Determination, quantitative, of hemoglobin A_2 with use of disc electrophoresis, 314
Diabetes mellitus, plasma creatinine in, 473
Dialysis, serum proteins in urine, examination of effects of methods used to concentrate urine, 1036
Digitalis glycosides, method for measuring plasma and tissue concentrations, 1048
Digitoxin and digoxin, urinary, in man, chemical determination, 694
Digoxin and digitoxin, urinary, in man, chemical determination, 694
–^{3}H, distribution and excretion of tritiated substances in animals following administration, 764
Dinucleotide, nicotinamide adenine, lactate dehydrogenase assays, control of inhibitory impurities, 144
Disc electrophoresis, quantitative determination of hemoglobin A_2 with, 314
Diuresis, chronic osmotic, effect on concentrating ability of small population of intact nephrons, 533
evaluation, in treatment of barbiturate intoxication, 898
Drug suppression in man, recovery of immune responsiveness after, 566
Dye, Coomassie blue, spectrophotometric determination, direct serum method, 177

E

Editors, letter from, 1
Electrodes, chronically implanted, effect of central nervous system stimulation on erythropoiesis in rats with, 713
Electrophoresis of acid-soluble proteins, synthesis by lymphocytes of chronic lymphocytic leukemia, 757

Electrophoresis—Cont'd
disc, quantitative determination of hemoglobin A_2 with use of, 314
thin-layer high-voltage, and chromatography on microplates, aminoaciduria screening by, 669
urea starch-gel, acidic buffer systems for, 650
Electrophoretic separation of lactate dehydrogenase isoenzymes and evaluation in medicine, 329
Endoreduplication in short-term cultures of human blood cells, 610
Endotoxin, inhaled, effects, 624
Enterococci, kinetics of synergism of penicillin-streptomycin and penicillin-kanamycin for, and relationship to L-phase variants, 792
Enzyme that catalyzes sulfobromophthalein-glutathione conjugation, effect of steroids on activity, 830
liver, that catalyzes sulfobromophthalein-glutathione conjugation, spectrophotometric assay of, 863
Erythrocyte(s) age, 51-chromium uptake as function, 70
and bone marrow, method for histochemical demonstration of, beta-glucuronidase and beta-galactosidase activity in, 709
catalase activity, human, effect of iron deficiency and red cell age on, 742
human, galactose-1-phosphate uridyl transferase, from normal and mutant subjects, biochemical properties, 947
normal and glucose-6-phosphate dehydrogenase–deficient, adenosine triphosphate content, including studies of glucose-6-phosphate dehydrogenase–deficient man with "elevated erythrocytic ATP," 726
reduced glutathione, glucose-6-phosphate dehydrogenase, and 6-phosphogluconic dehydrogenase in patients with myelofibrosis, 615
rhesus, adsorption, to liver tissue from patients with hepatitis, 994
storage characteristics among healthy donors, variability in, studies on preservation of human blood, 955
turnover with selenium-75-labeled methionine, investigation, 427
Erythrocytic 6-phosphogluconate dehydrogenase, hereditary variation, 255
Erythropoiesis, effect of central nervous system stimulation on, with chronically implanted electrodes, 713
Erythropoietic response to testosterone in mice, 420
Erythropoietin, effect, upon nucleic acid synthesis in erythropoietic tissue, 937
Erythropoietin—Cont'd
studies in patients undergoing renal homotransplantation, 386
Escherichia coli, evaluation of antibiotic therapy in acute pyelonephritis produced by, 546
Esters, methyl, high molecular weight fatty acid, gas chromatographic analysis, with molar response technique, 87
Estimation, quantitative, and separation of bilirubin fractions from serum and bile, 282

F

Factor XIII, pattern of inheritance of defective fibrinase, 914
Familial hypophosphatemic vitamin D–resistant rickets, measurement of bone formation in, 973
Fatty acid, high molecular weight, methyl esters of, gas chromatographic analysis with molar response technique, 87
Ferritin, detection in body fluids, specific and sensitive method for, 307
Fetal muscle heme protein, specific human, evidence for, 585
Fibrinase, defective, Factor XIII, pattern of inheritance, 914
Filtration, gel, Sephadex G-200, separation of macroglobulins from myeloma proteins by, 344
Fluids, body, detection of ferritin in, specific and sensitive method for, 307
Fluorometric method for determination of xanthurenic acid in urine, 520
Fraction(s), bilirubin, from serum and bile, nature, 294
separation and quantitative estimation, 282
cholesterol-complexing macromolecular, species differences in bile in relation to gallstone formation, 78
cold insoluble, of plasma, antihemophilic globulin concentrate from, 23

G

Galactose-1-phosphate uridyl transferase, human red cell, from normal and mutant subjects, biochemical properties, 947
Gallstone formation, species differences in cholesterol-complexing macromolecular fractions in bile in relation to, 78
γA-globulin, concentration, in serum, saliva, and nasopharyngeal secretions of infants and children, 922

Gas chromatographic analysis of high molecular weight fatty acid methyl esters with technique of molar response, 87

Gel filtration, separation of macroglobulins from myeloma proteins by, 344

Globulin concentrate, antihemophilic, from cold insoluble fraction of plasma, characterization and data on preparation and clinical trial, 23

Glomerulosa, zonal and juxtaglomerular cells in cirrhosis, evaluation of indices, 199

Glucose-1-C^{14}, measurement of ATP in tissues with use of $C^{14}O_2$ production from, 1013

-6-phosphate dehydrogenase, Chinese variant of, 374

tolerance, impaired, in patients with hypertriglyceridemia, 573

Glutathione, erythrocyte reduced, glucose-6-phosphate dehydrogenase, and 6-phosphogluconic dehydrogenase in patients with myelofibrosis, 615

Glycosides, digitalis, method for measuring plasma and tissue concentrations, 1048

Granulocyte output and production, agents influencing, in irradiated rabbits, 966

removal from blood, method for, 321

Group A hemolytic streptococci, studies on transmission within families, 483

H

Hageman factor and plasma thromboplastin antecedent in synovial fluid, presence of, 455

Haversian and endosteal bone formation, appositional rate, measured in tetracycline labeled human ribs, 633

Heat-stable lactate dehydrogenase isozyme-1, total lactate dehydrogenase, and hydroxybutyrate dehydrogenase, determination method, 131

Hemagglutinin response, correlation with bacteriuria; immunologic studies in urinary tract infections, 13

Heme protein, evidence for specific human fetal muscle, 585

Hemoglobin A_2, quantitative determination, with use of disc electrophoresis, 314

in blood, azide-methemoglobin method for determination, 116

chain synthesis, alpha and beta, studies of kinetics, 246

-coated charcoal assay of unsaturated iron-binding capacity, 855

studies on heterogeneity, nature of hemoglobin components produced in red blood cell hemolysates, 355

Hemolysates, red blood cell, nature of hemoglobin components produced in, 355

Hepatic necrosis, subacute, histochemistry of pseudolobule in, 33

Hepatitis, adsorption of rhesus erythrocytes to liver tissue from patients with, 994

Hereditary variation of erythrocytic 6-phosphogluconate dehydrogenase, 255

Histamine release from human leukocytes by lysolecithin and effect of in vitro anaphylaxis on leukocyte lipids, 601

technique for estimation, in blood and urine, 1044

Histochemical demonstration of beta-glucuronidase and beta-galactosidase activity in bone marrow and blood cells, method for, 709

Histochemistry of pseudolobule in subacute hepatic necrosis, 33

Hodgkin's disease, elevated plasma levels of hydroxyproline-containing protein in, and relationship to disease activity, 891

Homotransplantation, renal, erythropoietin studies in patients undergoing, 386

Hormones, thyroid, separation by thin-layer chromatography and quantitative measurement, 495

Humoral factor, erythropoietin, effect upon nucleic acid synthesis in erythropoietic tissue, 937

Hydroxybutyrate dehydrogenase, total lactate dehydrogenase, and heat-stable lactate dehydrogenase isozyme-1, determination method, 131

Hydroxyproline-containing protein in Hodgkin's disease, elevated plasma levels, and relationship to disease activity, 891

Hyperbilirubinemia, micromethod for measuring reserve albumin binding capacity in serum from newborn infants with, 660

Hypertension, radioiodine "clearance" from skin in, effect of angiotensin-II on, 265

relation to hepatic disease, 199

renal, renomedullary antihypertensive principle in, 778

Hypertriglyceridemia, impaired glucose tolerance in patients with, 573

Hypophosphatemic vitamin D–resistant rickets, familial, measurement of bone formation in, 973

I

Immune nephritis, modification by chloroamphenicol, 58

responsiveness, recovery after drug suppression in man, 566

Immunofluorescence, distribution of normal serum proteins within rat and human renal tubule cytoplasm demonstrated by, 189

Immunoglobulins, serum, in rheumatoid arthritis, 850

Immunologic studies in urinary tract infections, correlation of hemagglutinin response with bacteriuria following catheterization, 13

Impurities, inhibitory, in reduced nicotinamide adenine dinucleotide in lactate dehydrogenase assays, control, 144

Infections in urinary tract, immunologic studies in; correlation of hemagglutinin response with bacteriuria following catheterization, 13

Inheritance pattern of defective fibrinase (Factor XIII), 914

Intoxication, barbiturate, evaluation of diuresis in treatment, 898

Intrinsic factor, human, radioimmunoassay for, 879

-vitamin B_{12} complex, in vitro test for detection of serum antibody to, 510

Inulin in plasma and urine, automatic anthrone method for determination, 689

Iodine concentration, plasma inorganic, in thyrotoxicosis, 808

Iron-binding capacity and serum iron concentration, one-tube method for measuring, 171

unsaturated, coated charcoal assay of, 855

deficiency and red cell age, effect on human erythrocyte catalase activity, 742

serum concentration and unsaturated iron-binding capacity, one-tube method for measuring, 171

Isoenzymes, lactate dehydrogenase, electrophoretic separation of, and evaluation in medicine, 329

Isozyme-1, heat-stable lactate dehydrogenase, total lactate dehydrogenase, and hydroxybutyrate dehydrogenase, determination method, 131

J

Jaundice, influence on turbidimetric measurement of serum lipolytic activity, 127

Junction, liquid, raising from room temperature to 37.5° C., apparent pH of blood and buffer caused by, 516

Juxtaglomerular cells, and zona glomerulosa, indices of, in cirrhosis, 199

K

Kanamycin with penicillin, kinetics of synergism for enterococci, 792

Kinetics of alpha and beta hemoglobin chain synthesis, 246

of I^{131} rose bengal in normal and cirrhotic subjects studied by compartmental analysis and digital computer, 983

of synergism of penicillin-streptomycin and penicillin-kanamycin for enterococci and relationship to L-phase variants, 792

L

Labeling, tetracycline, in dog rib, radial rate of osteon closure evaluated by, 447

Lactate dehydrogenase assays, control of inhibitory impurities in nicotinamide adenine dinucleotide, 144

total, heat-stable lactate dehydrogenase isozyme-1, and hydroxybutyrate dehydrogenase, determination method, 131

Letter from editors, 1

Leukemia, chronic lymphocytic, synthesis of acid-soluble proteins by lymphocytes of, 757

Leukocyte production and release, mechanisms of; studies on leukocytosis-inducing factor in plasma of rats treated with typhoid-paratyphoid vaccine, 398

Leukocytes, human, histamine release from by lysolecithin and effect of in vitro anaphylaxis on leukocyte lipids, 601

Leukocytosis-inducing factor in plasma of rats treated with typhoid-paratyphoid vaccine, 398

Lipids, leukocyte, effect of in vitro anaphylaxis on, and histamine release from human leukocytes by lysolecithin, 601

Lipolytic activity, plasma, postheparin in patients with cirrhosis of liver, 461

serum activity, jaundice influence on turbidimetric measurement, 127

Liver tissue, adsorption of rhesus erythrocytes to, from patients with hepatitis, 994

Livers, normal, damaged, and Gunn rat, formation of bilirubin in, 817

L-phase variants, kinetics of synergism of penicillin-streptomycin and penicillin-kanamycin for enterococci and relationship to, 792

Lymphocytes of chronic lymphocytic leukemia, synthesis of acid-soluble proteins by, 757

thoracic duct, following thymectomy in guinea pig, 439

Lysolecithin, histamine release from human leukocyte by, and effect of in vitro anaphylaxis on leukocyte lipids, 601

M

Macroglobulin, alpha-2, and trypsin-binding activity, elevation in nephrosis, 559

Macroglobulins, separation from myeloma proteins by Sephadex G-200 gel filtration, 344

Manganese concentrations, stability in human blood and serum, neutron activation analysis, 836

Methionine, selenium-75-labeled, investigation of erythrocyte turnover with, 427

Micromethod for measuring reserve albumin binding capacity in serum from newborn infants with hyperbilirubinemia, 660

Microplates, aminoaciduria screening by thin-layer high-voltage electrophoresis and chromatography on, 669

Molar response technique, gas chromatographic analysis of high molecular weight fatty acid methyl esters, 87

Muscle, fetal, specific heme protein, evidence for, 585

Myelofibrosis, erythrocyte reduced glutathione, glucose-6-phosphate dehydrogenase, and 6-phosphogluconic dehydrogenase in patients with, 615

Myeloma proteins, separation of macroglobulins from, by Sephadex G-200 gel filtration, 344

N

Nasopharyngeal secretions, serum, and saliva of infants and children, concentration of γA-globulin in, 922

Necrosis, hepatic, subacute, histochemistry of pseudolobule in, 33

Neonatal thyroxine administration, persistent thyrotropin insufficiency following, 477

Nephritis, immune, modification by chloramphenicol, 58

radiation, canine, renal concentrating defect in, 209

Nephrons, intact, effect of chronic osmotic diuresis on concentrating ability of small population of, 533

Nephrosis, elevation of alpha-2 macroglobulin and trypsin-binding activity in, 559

Nervous system stimulation, central, effect on erythropoiesis in rats with chronically implanted electrodes, 713

Neutron activation analysis: stability of manganese concentrations in human blood and serum, 836

Nicotinamide adenine dinucleotide in lactate dehydrogenase assays, control of inhibitory impurities, 144

Nitrous oxide, analysis by gas chromatography in measurement of cerebral and coronary blood flow, 678

Nucleic acid synthesis, effect of erythropoietin upon, in erythropoietic tissue, 937

O

Ornithine carbamoyl transferase activity, automatic method for determination, 154

Osteon closure evaluated by tetracycline labeling in dog rib, radial rate, 447

P

Pancreatitis, turbidimetric serum phospholipase A activity in, 108

Penicillin-streptomycin and penicillin-kanamycin, kinetics of synergism, for enterococci and relationship to L-phase variants, 792

Peritoneal sodium transport, enhancement by pharmacologic and physical agents, 181

pH, apparent, of blood and buffer, difference caused by raising liquid junction from room temperature to 37.5° C., 516

Pharmacologic and physical agents, enhancement of peritoneal sodium transport by, 181

Phosphate, galactose-1-, uridyl transferase, human red cell, from normal and mutant subjects, biochemical properties, 947

Phospholipase A activity, turbidimetric serum, in pancreatitis, 108

Phospholipids, chemical analysis of platelets from patients with thrombocytopathy, with reference to, 229

Physiologic interaction between ceruloplasmin and serotonin, study, 934

Plasma, antihemophilic factor activity in, measurement, 1025

cold insoluble fraction, antihemophilic globulin concentrate from, 23

creatinine, in diabetes mellitus, 473

inorganic iodine concentration in thyrotoxicosis, 808

levels, elevated, of hydroxyproline-containing protein in Hodgkin's disease and relationship to disease activity, 891

of rats treated with typhoid-paratyphoid vaccine, leukocytosis-inducing factor in, 398

Plasma—Cont'd
thromboplastin antecedent and Hageman factor in synovial fluid, presence of, 455
and tissue concentrations of digitalis glycosides, method for measuring, 1048
and urine, inulin in, automatic anthrone method for determination, 689
Platelet protein abnormality, thrombasthenia, immunologic evidence of, 411
Postheparin plasma lipolytic activity in patients with cirrhosis of liver, 461
Prealbumin, thyroxine-binding, determination of maximal binding capacity and protein concentration in serum, 500
Preservation of human blood, variability in erythrocyte storage characteristics among healthy donors, 955
Protein(s), acid-soluble, synthesis by lymphocytes of chronic lymphocytic leukemia, 757
components, bile-specific, in human hepatic bile, 640
concentration and maximal binding capacity of thyroxine-binding prealbumin in serum, determination, 500
heme, evidence for specific human fetal muscle, 585
hydroxyproline-containing, elevated plasma levels, in Hodgkin's disease and relationship to disease activity, 891
myeloma, separation of macroglobulins from, by Sephadex G-200 gel filtration, 344
normal serum, distribution, within rat and human renal tubule cytoplasm, demonstrated by immunofluorescence, 189
platelet, abnormality, thrombasthenia, immunologic evidence of, 411
serum, in urine, examination of effects of methods used to concentrate urine, 1036
Proteinuria, augmentation after acute sodium depletion in rat, 224
Pseudolobule, histochemistry of, in subacute hepatic necrosis, 33
Pyelonephritis, acute, produced by *Escherichia coli*, evaluation of antibiotic therapy in, 546

R

Radial rate of osteon closure, evaluation by tetracycline labeling, 447
Radiation nephritis, renal concentrating defect in, 209
Radioimmunoassay for human intrinsic factor, 879
Radioiodine "clearance" from skin in hypertension, effect of angiotensin-II on, 265
Red blood cell hemolysates, nature of minor hemoglobin components produced on aging, 355
normal and glucose-6-phosphate dehydrogenase–deficient, adenosine triphosphate content, including studies of glucose-6-phosphate dehydrogenase–deficient man with "elevated erythrocytic ATP," 726
cell, age, 51-chromium uptake as function, 70
and iron deficiency, effect on human erythrocyte catalase activity, 742
human, galactose-1-phosphate uridyl transferase, from normal and mutant subjects, biochemical properties, 947
Renal concentrating defect in canine radiation nephritis, 209
homotransplantation, erythropoietin studies in patients undergoing, 386
hypertension, renomedullary antihypertensive principle in, 778
tubule cytoplasm, distribution of normal serum proteins within, demonstrated by immunofluorescence, 189
Renomedullary antihypertensive principle in renal hypertension, 778
Respiratory gases, carbon monoxide in, modified chemical analysis for, 873
Reynolds critical flow in human airway, experimental value, 43
Rheumatoid arthritis, serum immunoglobulins in, 850
Rickets, familial hypophosphatemic vitamin D–resistant, measurement of bone formation rate in, 973
Rose bengal, I^{131}, kinetics, in normal and cirrhotic subjects, studied by compartmental analysis and digital computer, 983

S

Saliva, serum, and nasopharyngeal secretions of infants and children, concentration of γ A-globulin in, 922
Scientific success, hazards, 6
Selenium-75-labeled methionine, investigation of erythrocyte turnover, 427
Semiquantitative procedure for estimating serum antitrypsin levels, 528
Separation, electrophoretic, of lactate dehydrogenase isoenzymes and evaluation in medicine, 329
of macroglobulins from myeloma proteins by Sephadex G-200 gel filtration, 344
and quantitative estimation of bilirubin fractions from serum and bile, 282
of thyroid hormones by thin-layer chromatography and quantitative measurement, 495

Serotonin and ceruloplasmin, study of physiologic interaction between, 934
Serum antibody to intrinsic factor-vitamin B_{12} complex, in vitro test for detection, 510
antitrypsin levels, semiquantitative procedure for estimating, 528
and bile, bilirubin fractions from, nature, 294
separation and quantitative estimation, 282
and blood, human, stability of manganese concentrations in, neutron activation analysis, 836
determination of maximal binding capacity and protein concentration of thyroxine-binding prealbumin in, 500
immunoglobulins in rheumatoid arthritis, 850
lipolytic activity, jaundice influence on turbidimetric measurement, 127
saliva, and nasopharyngeal secretions of infants and children, concentration of γ A-globulin in, 922
turbidimetric, phospholipase A activity in pancreatitis, 108
Sodium depletion, augmentation of proteinuria in rat, after, 224
transport, peritoneal, enhancement by pharmacologic and physical agents, 181
Species differences in cholesterol-complexing macromolecular fractions in bile in relation to gallstone formation, 78
Spectrophotometric assay of liver enzyme that catalyzes sulfobromophthalein-gluthathione conjugation, 863
determination of Coomassie blue dye by direct serum method, 177
Steriods, effect on activity of enzyme that catalyzes sulfobromophthalein-glutathione conjugation, 830
Streptococci, hemolytic, Group A, studies on transmission within families, 483
Streptomycin with penicillin, kinetics of synergism for enterococci, 792
Sulfobromophthalein-glutathione conjugation, effect of steroids on activity of enzyme that catalyzes, 830
spectrophotometric assay of liver enzyme that catalyzes, 863
Synergism of penicillin-streptomycin and penicillin-kanamycin, kinetics of, for enterococci and relationship to L-phase variants, 792
Synovial fluid, presence of Hageman factor and plasma thromboplastin antecedent in, 455
Synthesis, alpha and beta hemoglobin chain, studies of kinetics, 246
nucleic acid, effect of erythropoietin upon, in erythropoietic tissue, 937

T

Testosterone, erythropoietic response to, in mice, 420
Tetracycline labeled human ribs, appositional rate of Haversian and endosteal bone formation measured in, 633
labeling in dog rib, radial rate of osteon closure evaluated by, 447
Thoracic duct lymphocytes following thymectomy in guinea pig, 439
Thrombasthenia, immunologic evidence of platelet protein abnormality, 411
Thrombocytopathy, chemical analysis of platelets from patients with, with reference to phospholipids, 229
Thromboplastin antecedent, plasma, and Hageman factor in synovial fluid, presence of, 455
Thymectomy, effect, on golden hamster *(Mesocricetus auratus)*, 273
thoracic duct lymphocytes following, in guinea pig, 439
Thyroid hormones, separation by thin-layer chromatography and quantitative measurement, 495
Thyrotoxicosis, plasma inorganic iodine concentration, in, 808
Thyrotropin insufficiency, persistent, following neonatal thyroxine administration, 477
Thyroxine, administration, neonatal, persistent thyrotropin insufficiency, 477
-binding prealbumin in serum, determination of maximal binding capacity and protein concentration, 500
Tissues, cantharidin determination in, and subcellular location, 98
Transferase, ornithine carbamoyl, activity, automatic method for determination, 154
uridyl, galactose-1-phosphate, human red cell, from normal and mutant subjects, biochemical properties, 947
Tritiated substances, distribution and excretion in animals following administration of digoxin-^{3}H, 764
Trypsin-binding activity and alpha-2 macroglobulin elevation in nephrosis, 559
Turbidimetric measurement, serum lipolytic activity, influence of jaundice on, 127
serum phospholipase A activity in pancreatitis, 108
Typhoid-paratyphoid vaccine, leukocytosis-inducing factor in plasma of rats treated with, 398

U

Urea starch-gel electrophoresis, acidic buffer systems for, 650
Uremic environment, effects on renal concentrating mechanism, 533
Uridyl transferase, galactose-1-phosphate, human red cell, from normal and mutant subjects, biochemical properties, 947

Urinary digitoxin and digoxin in man, chemical determination, 694
pH, evaluation of diuresis in treatment of barbiturate intoxication, 898
titratable acid, potential error in measurement, 906
tract infections, immunologic studies, correlation of hemagglutinin response with bacteriuria following catheterization, 13
Urine and blood, histamine in, technique for estimation, 1044
fluorometric method for determination of xanthurenic acid in, 520
and plasma, inulin in, automatic anthrone method for determination, 689
Urine—Cont'd
serum proteins in, examination of effects of methods used to concentrate urine, 1036

V

Vitamin B_{12} complex, intrinsic factor, in vitro test for detection of serum antibody to, 510
D-resistant rickets, familial hypophosphatemic, measurement of bone formation in, 973

X

Xanthurenic acid in urine, fluorometric method for determination, 520

ZLOTNICK, A., AND LANDAU, S. Immunoelectrophoretic studies in patients with cryofibrinogenemia, 70

Subject index*

A

Acatalasemic mouse, reversal of H_2O_2 toxicity in, by catalase administration, suggested model for possible replacement therapy of inborn errors of metabolism, 952

Acetoacetate, pyruvate, lactate, and β-hydroxybutyrate levels in plasma, semiautomated fluorimetric method for enzymatic determination, 340

Acetylphenylhydrazine, primaquine and, effect on enzymatic and nonenzymatic oxidation of reduced pyridine nucleotides, 1

Acid(s), amino, insulin secretion induced with, augmentation by human growth hormone, 874 (Abst.)

-base and electrolyte measurements during recovery from severe treadmill exercise, 865 (Abst.)

bile, composition of gallstones from man, 186

citric, metabolism in overweight human diabetic and nondiabetic subjects during total caloric fasting, 868 (Abst.)

δ-aminolevulinic, -4-C^{14} in dogs, studies on biosynthetic production of bilirubin-C^{14}, 905

dihydroxy primary bile, pathway in cholesterol catabolism, predominance in liver cirrhosis; potential source of liver injury, 862 (Abst.)

ethacrynic, enhanced bromuresis, comparison with peritoneal and hemodialysis, 913

and furosemide differences in acute effects in man, 1021 (Abst.)

hydrochlorothiazide, and diazoxide, adrenocortical responses in humans to, 871 (Abst.)

free fatty, serum, and thrombosis, a necropsy study, 1025 (Abst.)

indoleacetic, effect on plasma insulin of patients with diabetes mellitus, 998 (Abst.)

neutralization in human duodenum, 1028 (Abst.)

ribonucleic, metabolism during primary antibody response, 991 (Abst.)

ribosenucleic, determination in nonnucleated erythroid cells, 833

uric 2-^{14}C, movement in everted proximal ileum of rat, 1023 (Abst.)

Acidemia, lactic, induced in rabbits by infusions of hypertonic glucose, 852 (Abst.)

Acidosis of chronic renal disease, effect of treatment on calcium metabolism, 994 (Abst.)

Acromegalic subjects, exercising, paradoxical growth hormone response in, 991 (Abst.)

Acrylamide electrophoresis, refinements, 842

Adenosine and ATP, enhancement of coronary vasodilator action, after Lidoflazine, 852 (Abst.)

triphosphate, fat transport, and rat jejunal disaccharidases, effects of neomycin and gluten on, 1006 (Abst.)

Adrenalectomized dogs, influence of potassium on plasma renin activity in, 874 (Abst.)

Adrenergic blockade and carbon dioxide retention, studies during, upper extremity total and forearm blood flow in patients with chronic obstructive pulmonary disease, 992 (Abst.)

Adrenocortical response to hemorrhage, evidence for mediating two independent neural pathways, 876 (Abst.)

in humans to ethacrynic acid, hydrochlorothiazide, and diazoxide, 871 (Abst.)

Age, renal disease, hypertension, diuretics, and calcium, influence on antidiuretic responses to suboptimal infusions of vasopressin, 206

Agglutinin activity, cold, dependence on presence of kappa chains, 868 (Abst.)

AHF, human, biochemical properties, (Factor VIII) separated from fibrinogen with manganous chloride and thrombin, 803

Airways obstruction, transfer factor for carbon monoxide in patients with, 857 (Abst.)

Albumin, extravascular, determination in rat, 177

I^{131}-labeled colloidal human serum, in study of reticuloendothelial system function, distribution of free and colloid-bound radioiodide, 972

*July, pp. 1-176; August, pp. 177-356; September, pp. 357-530; October, pp. 531-712; November, pp. 713-892; December, pp. 893-1068.

Alcohol withdrawal syndromes, comparative evaluation of treatments, 878 (Abst.)
Aldosterone, renin-, assay results, interpretation in hypertensive patients, 873 (Abst.)
Allergic encephalomyelitis, experimental, cell transfer of, donor and recipient cell–nervous tissue interactions, 1003 (Abst.)
Alpha hemolysin, effect of antibiotics on production, by *Staphylococcus aureus*, 890 (Abst.)
Alternans, mechanical and postextrasystolic potentiation, electrophysiologic aspects, 870 (Abst.)
Amino acids, insulin secretion induced with, augmentation by human growth hormone, 874 (Abst.)
δ-Aminolevulinic acid-4-C^{14} in dogs, improved method utilizing, studies on biosynthetic production of bilirubin-C^{14}, 905
AMP, 3′, 5′-cyclic, and epinephrine, with activation of myocardial lipase, 890 (Abst.)
Androsterone, urinary, etiocholanolone, and dehydroepiandrosterone in normal male rhesus monkey, 981
Anemia, blood destruction during exercise as prototype, associated with cardiac prostheses and valvular heart disease, 860 (Abst.)
hemolytic, erythrocytic enzyme defect with, glyceraldehyde-3-phosphate dehydrogenase deficiency, 879 (Abst.)
pernicious, effect of small amounts of vitamin B_{12} on hemolysis and role in remission in, 879 (Abst.)
of WWv mice, effects of testosterone on, 875 (Abst.)
Antacids, gastric mucosal coating and gastric emptying time, gastrocamera study, 999 (Abst.)
Antibiotics, basic, and N-methylated neomycin, cholesterol-lowering effects, 753
on production of alpha hemolysin by *Staphylococcus aureus*, 890 (Abst.)
protoplast and bacterial forms of *Streptococcus faecalis*, 543
Antibody activity, serum, in patients with histoplasmosis as measured by passive hemagglutination, 881 (Abst.)
deficiency syndromes, unified proposal for evolution of immunoglobulins and pathogenesis, 889 (Abst.)
forming capacities of enteroviruses and reoviruses, effect of periodate oxidation on, 1024 (Abst.)
fragments, rabbit, in phagocytosis, biologic activity of, 1005 (Abst.)
response, primary, ribonucleic acid metabolism, 991 (Abst.)
Antidiuretic responses to suboptimal infusions of vasopressin, influence of age, renal disease, hypertension, diuretics, and calcium on, 206
Antitoxin, staphylococcal enterotoxin B, radioimmunoassay for, 678
Aortic cholesterol and plasma lipoprotein variations in cholesterol-fed cockerels, 885 (Abst.)
valves, Starr Edwards, pitfalls in postoperative evaluation, 1015 (Abst.)
Arrythmias, cardiac, caused by cardiorespiratory interaction in Cheyne-Stokes respiration, 891 (Abst.)
Arterial and venous tissue, human, citrate condensing enzyme activity, 888 (Abst.)
Arthritis, gouty, acute, mechanism of inflammation, activation of permeability factor activity in synovial fluid by urate crystals, 887 (Abst.)
associated with hepatorenal glycogen storage disease, pathogenesis and treatment of, 1007 (Abst.)
rheumatoid, abnormalities of connective tissue cells cultured from patients with, relative unresponsiveness of rheumatoid synovial cells to hydrocortisone, 300
Assay, radioisotopic, of serum vitamin B_{12} with DEAE cellulose, 510
ATP and adenosine, enhancement of coronary vasodilator action, after Lidoflazine, 852 (Abst.)
/ADP ratio of human platelets, effects of ethylenediaminetetraacetate and citrate upon, 1009 (Abst.)
Atrial systole in man, observations on effect, 224
Autoantibodies as mediators of experimental autoimmune nephritis in sheep, further evidence for, 1021 (Abst.)
Autoimmune nephritis in sheep, experimental, further evidence for autoantibodies as mediators, 1021 (Abst.)
Autoimmunity to muscle and thymus in myasthenia gravis, 851 (Abst.)
Autonomic defect in orthostatic hypotension, 851 (Abst.)
Autoradiography, distribution of norepinephrine-H^3 in myocardium of reserpinized dogs determined by, 867 (Abst.)
Autoregulation of glucose metabolism in isolated perfused rat liver, 997 (Abst.)

B

B_{12}, vitamin, in man, rapid quantitative method for measuring intestinal absorption, using double label hepatic uptake test, 163
Bacterial clearance mechanisms of lung, effect of acute renal failure on, 531
endotoxin, effect of neonatal thymectomy on, susceptibility to, 455
inactivation, intrapulmonary, method for quantitating in animals, 669
Bedsonia agent in Hodgkin's disease, serologic reactivity to, 1019 (Abst.)
Beer drinkers, cardiohepatic failure in, 1022 (Abst.)

Bence-Jones proteins, low molecular weight L-chain components related to, 81
Bicarbonate secretion, ileal, and dependency on intraluminal chloride, 882 (Abst.)
Bile acid composition of gallstones from man, 186
pathway, dihydroxy primary, in cholesterol catabolism, predominance in liver cirrhosis; potential source of liver injury, 862 (Abst.)
formation in biliary tree of guinea pig, two sites, 875 (Abst.)
gallbladder, human, surface tension and chemical composition, 1023 (Abst.)
salt turnover rates, estimation in normal subjects and patients with steroid wasting syndromes, 1019 (Abst.)
studies on importance of lecithin for cholesterol solubilization in, 90
Biliary tree of guinea pig, two sites of bile formation in, 875 (Abst.)
Bilirubin-C^{14}, studies on biosynthetic production, improved method utilizing δ-aminolevulinic acid-4-C^{14} in dogs, 905
Bioassay of malignant, nonmalignant, and normal blood in chick embryo system; studied on factor(s) toxic to chick embryo in blood of human malignancy, 588
Biochemical properties of human AHF (Factor VIII) separated from fibrinogen with manganous chloride and thrombin, 803
Biologic activity of rabbit antibody fragments in phagocytosis, 1005 (Abst.)
Biological fluids, unconcentrated, micromethod for quantitation of proteins in, electroimmunodiffusion, 864 (Abst.)
Biopsies, needle, method for identifying tissues and internal organs in cat, potential differences between skin and internal organs, 418
Biosynthesis, protein, in colon epithelium, studies in whole tissue and cell-free systems of rodent and man, 859 (Abst.)
Biosynthetic production of bilirubin-C^{14}, studies on, improved method utilizing δ-aminolevulinic acid-4-C^{14} in dogs, 905
Blood cells, circulating, and plasma proteins, methionine Se^{75}-uptake in, 1005 (Abst.)
red, stromal proteins in Tay-Sachs disease, 855 (Abst.)
–cerebrospinal fluid barrier in myxedema, study, 1012 (Abst.)
destruction during exercise as prototype of anemias associated with cardiac prostheses and valvular heart disease, 860 (Abst.)
Blood—Cont'd
flow, coronary, measurements in humans with coincidence counting system and single slug injection of $Rb^{84}Cl$, 1018 (Abst.)
and oxygen, effect on left ventricular contractile force, 869 (Abst.)
peripheral, effects of isoproterenol on distribution before and after hemorrhage, 870 (Abst.)
total and peripheral, studies, hemodynamic response to respiratory tract infections, 57
upper extremity total and forearm, in patients with chronic obstructive pulmonary disease, studies during carbon dioxide retention and adrenergic blockade, 992 (Abst.)
gases, electrolytes, and hydrogen ion, serial measurement in forearm exercise and during recovery, 1004 (Abst.)
of human malignancy, studies on factor(s) toxic to chick embryos in; bioassay of malignant, nonmalignant, and normal blood in chick embryo system, 588
incubation at 37° C. for malaria parasite cultivation and study of blood storage, 881 (Abst.)
oxygen, microdiffusion determination, 824
tension, bedside determination, 686
platelets, studies of effect of coumarin on, 383
rapid chromatographic method for identification and estimation of glutethimide (Doriden) in, 333
red cell, normal, effects of reduced glutathione on, clues to corpuscular defect in paroxysmal nocturnal hemoglobinuria, 997 (Abst.)
storage, study, incubation of blood at 37° C. for malaria parasite cultivation, 881
Bone dynamics, cortical, measured by tetracycline labeling in 21 cases of osteoporosis, 599
marrow cultures, effect of chloramphenicol on RNA and heme synthesis in, 400
and leukemic blood leukocytes, DNA labeling with tritiated thymidine; H^3 thymidine biochemistry in vitro, 566
Bradykinin, evidence against, as mediator of inflammation in canine joints, 433
Branch block, left bundle, delay in Korotkoff sounds in, 993 (Abst.)
Breast cancer, paradoxical secretion of growth hormone in patients with, 1011 (Abst.)
Breathing in Marfan syndrome, mechanics, 864 (Abst.)
Bromuresis, ethacrynic acid enhanced, comparison with peritoneal and hemodialysis, 913
Bronchiectasis, effect of lower respiratory infection on lung function in, 863 (Abst.)

Bronchiolar cell, nonciliated, source of pulmonary surfactant, 1001 (Abst.)
Bundle branch block, left, delay in Korotkoff sounds in, 993 (Abst.)
Bursitis, ecologic, specific and nonspecific therapy, 1008 (Abst.)

C

Calcium, absorption in dog, small intestinal secretion and, role of intraluminal calcium compartments, 1013 (Abst.)
age, renal disease, hypertension, diuretics and, influence on antidiuretic responses to suboptimal infusions of vasopressin, 206
compartments, intraluminal, role, 1013 (Abst.)
metabolism, effect of treatment of acidosis of chronic renal disease on, 994 (Abst.)
Caloric fasting, total, citric acid metabolism in overweight human diabetic and nondiabetic subjects during, 868 (Abst.)
Cancer, breast, paradoxical secretion of growth hormone in patients with, 1011 (Abst.)
lung, alterations of serum lactate dehydrogenase isoenzymes during therapy directed at, 314
Carbohydrate, serum insulin, and lipid abnormalities in patients with premature coronary heart disease, 1025 (Abst.)
Carbon dioxide retention and adrenergic blockade, studies during, upper extremity total and forearm blood flow in patients with chronic obstructive pulmonary disease, 992 (Abst.)
monoxide, transfer factor for, in patients with airways obstruction, 857 (Abst.)
Cardiac arrhythmias caused by cardiorespiratory interaction in Cheyne-Stokes respiration, 891 (Abst.)
prostheses and valvular heart disease, blood destruction during exercise as prototype of anemias associated with, 860 (Abst.)
Cardiohepatic failure in beer drinkers, 1022 (Abst.)
Cardiorespiratory interaction, cardiac arrhythmias caused by, in Cheyne-Stokes respiration, 891 (Abst.)
Cardiovascular responses to cold pressor test, tilt, and smoking in nonsmokers and smokers, 995 (Abst.)
Cartilage, hypophysectomy of rat, synchronous activation of DNA synthesis, by growth hormone, 357
Catalase administration, reversal of H_2O_2 toxicity in acatalasemic mouse by, suggested model for possible replacement therapy of inborn errors of metabolism, 952
Cell(s), blood, circulating, and plasma proteins, methionine Se^{75}-uptake in, 1005 (Abst.)
chick embryo, toxicity, and anti-Rous sarcoma virus activity into human sera during processing, 694
chloroleukemic, RNA patterns in, 1015 (Abst.)
connective tissue, cultured from patients with rheumatoid arthritis, abnormalities, relative unresponsiveness of rheumatoid synovial cells to hydrocortisone, 300
culture systems, three, comparison of sensitivity for recovery of virus, identification of rubella virus isolates by immunofluorescent staining, 502
erythropoietic, labeled with Fe^{55} or Fe^{59}, improved method for radioautography, 523
-free systems and whole tissue, studies in rodent and man; protein biosynthesis in colon epithelium, 859 (Abst.)
leukemic, populations, cause of variation in proliferative activity, 1012 (Abst.)
nonciliated bronchiolar, source of pulmonary surfactant, 1001 (Abst.)
nonnucleated erythroid, determination of ribosenucleic acid in, 833
recipient, and nervous tissue interactions, donor, 1003 (Abst.)
red, assay of glucose-6-phosphate dehydrogenase and 6-phosphogluconate dehydrogenase in, 149
blood, normal, effects of reduced glutathione on, clues to corpuscular defect in paroxysmal nocturnal hemoglobinuria, 997 (Abst.)
stromal proteins in Tay-Sachs disease, 853 (Abst.)
simultaneous, and plasma volume determinations by differential absorption method, 142
rheumatoid synovial, relative unresponsiveness to hydrocortisone, abnormalities of connective tissue cells cultured from patients with rheumatoid arthritis, 300
in suspension, apparatus for concentrating, onto microscope slide, 494
transfer of experimental allergic encephalomyelitis (EAE): donor and recipient cell–nervous tissue interactions, 1003 (Abst.)
Cellulose, DEAE, radioisotopic assay of serum vitamin B_{12} with, 510
Centrifuge, slide, apparatus for concentrating cells in suspension onto microscope slide, 494
Cerebrospinal fluid–blood barrier in myxedema, study, 1012 (Abst.)
determination of gamma globulin in, by quantitative chromatography, 120
Ceruloplasmin, serum, levels in normal individuals, factors influencing, 893
Charcoal, coated, desorption from, alternative to coated charcoal T_2 test, 113

Chemical composition, surface tension and, of human gallbladder bile, 1023 (Abst.)
Chest, pulsatile distensions, 883 (Abst.)
Cheyne-Stokes respiration, cardiac arrhythmias caused by cardiorespiratory interaction in, 891 (Abst.)
Chloramphenicol on RNA and heme synthesis in bone marrow cultures, 400
Chloride, intraluminal, ileal bicarbonate secretion and dependency on, 882 (Abst.)
manganous, and thrombin, biochemical properties of human AHF (Factor VIII) separated from fibrinogen with, 803
Chloroleukemic cells, RNA patterns in, 1015 (Abst.)
p-Chlorophenoxyisobutyrate, ethyl, changes in microbodies induced by, 854 (Abst.)
Cholesterol, aortic, and plasma lipoprotein variations in cholesterol-fed cockerels, 885 (Abst.)
catabolism in liver cirrhosis, predominance of dihydroxy primary bile acid pathway in; potential source of liver injury, 862 (Abst.)
-lowering effects of N-methylated neomycin and basic antibiotics, 753
solubilization in bile, studies on importance of lecithin for, 90
Cholestyramine administration, effect on serum lipids and on nitrogen balance in familial hypercholesterolemia, 12
Chromatographic, rapid, method for identification and estimation of glutethimide (Doriden) in blood, 333
Chromatography, quantitative, determination of gamma globulin in cerebrospinal fluid by, 120
Chromium, intestinal absorption of trace quantities, 484
Chromosome abnormalities in preleukemia, 1009 (Abst.)
Circulating thrombogenic procoagulants and liver, 1026 (Abst.)
Cirrhosis, liver, predominance of dihydroxy primary bile acid pathway in cholesterol catabolism in; potential source of liver injury, 862 (Abst.)
Citrate condensing enzyme activity of human arterial and venous tissue, 888 (Abst.)
and ethylenediaminetetraacetate, effects upon ATP/ADP ratio of human platelets, 1009 (Abst.)
Citric acid metabolism in overweight human diabetic and nondiabetic subjects during total caloric fasting, 868 (Abst.)
Clinodactyly, familial nephropathy, and short stature, study of kindred, 876 (Abst.)
Clofibrate, ethyl p-chlorophenoxyisobutyrate, changes in microbodies induced by, 854 (Abst.)
Coagulation factors, vitamin K–dependent, synthesis by isolated rat liver, 887 (Abst.)
and plasma fibrinogen function, effect of plasma proteolysis ("fibrinolysis") on, 853 (Abst.)
Coated charcoal T_2 test, alternative to, desorption from coated charcoal, 113
Collagen coated beads, measurement of platelet adhesiveness with, 873 (Abst.)
Collector, urine, low temperature, for unstable compounds, 173
Colloid-bound and free radioiodide, distribution, I^{131}-labeled colloidal human serum albumin in study of reticuloendothelial system function, 972
Colloidal human serum albumin, I^{131}-labeled, in study of reticuloendothelial system function, distribution of free and colloid-bound radioiodide, 972
material, clearance, by reticuloendothelial system, effect of homologous and heterologous carrier on, 286
Colon epithelium, protein biosynthesis in, studies in whole tissue and cell-free systems of rodent and man, 859 (Abst.)
Colorado tick fever, immunofluorescent staining in laboratory diagnosis, 923
Colorimetric method, simple rapid, for determination of creatine kinase activity, 324
Complement and complement components, studies in human disease, 877 (Abst.)
Compounds, unstable, low temperature urine collector for, 173
Computer diagnosis, nonindependence of symptoms and conditional probability approach to, 858 (Abst.)
Congenital fibrinogen deficiencies, aggregation, adhesion, and viscous metamorphosis of platelets in, 21
Connective tissue cells cultured from patients with rheumatoid arthritis, abnormalities, relative unresponsiveness of rheumatoid synovial cells to hydrocortisone, 300
Control system regulating sodium excretion in uremic man, observation on, 1017 (Abst.)
Coronary blood flow (CBF) measurements in humans with coincidence counting system and single slug injection of $Rb^{84}Cl$, 1018 (Abst.)
circulation, myocardial contractility, and oxygen metabolism, effects of synthetic vasopressin on, 1000 (Abst.)
heart disease, premature, serum insulin, carbohydrate, and lipid abnormalities in patients with, 1025 (Abst.)
and systemic hemodynamic effects of vasopressin, 867 (Abst.)
vasodilator action of ATP and adenosine after Lidoflazine enhancement, 852 (Abst.)

Corpuscular defect, clues in paroxysmal nocturnal hemoglobinuria, effects of reduced glutathione on normal R.-B.C., 997 (Abst.)
Cortical bone dynamics measured by tetracycline labeling in 21 cases of osteoporosis, 599
Coumarin on blood platelets, studies, 383
Counting system, coincidence, and single slug injection of $Rb^{84}Cl$, coronary blood flow measurements in humans with, 1018 (Abst.)
Creatine kinase activity, simple rapid colorimetric method for determination, 324
phosphokinase, cysteine-stimulated serum, 636
Cryofibrinogenemia, immunoelectrophoretic studies in patients with, 70
Cryoglobulinemia, transient, in infectious mononucleosis, 885 (Abst.)
Crystal induced inflammation in canine joints; evidence against bradykinin as mediator of inflammation, 433
Culture, cell, three systems, comparison of sensitivity for recovery of virus, identification of rubella virus isolates by immunofluorescent staining, 502
bone marrow, effect of chloramphenicol on RNA and heme synthesis in, 400
Cysteine-stimulated serum creatine phosphokinase, 636
Cytoxan, inhibition of hemagglutinin synthesis by, specificity and drug-induced "tolerance," 103

D

DEAE cellulose, radioisotopic assay of serum vitamin B_{12} with, 510
Dehydroepiandrosterone, urinary androsterone, and etiocholanolone, determination in normal male rhesus monkey, 981
Dehydrogenase deficiency, glyceraldehyde-3-phosphate, erythrocytic enzyme defect with hemolytic anemia, 879 (Abst.)
glucose-6-phosphate, hereditary quantitative variant, characterized by increase in, 560
and 6-phosphogluconate dehydrogenase, assay in red cells, 149
isozymes, serum lactic, sex-related difference in, 865 (Abst.)
leukocyte glucose-6-phosphate, characterization in normal and mutant human subjects, 552
serum lactate, isoenzymes, alterations, during therapy directed at lung cancer, 314
Denucleation, erythroblast, studies of mechanism, 853 (Abst.)
Desorption from coated charcoal, alternative to coated charcoal T_2 test, 113
Diabetes mellitus, effect of indoleacetic acid on plasma insulin of patients with, 998 (Abst.)
Diabetic and nondiabetic subjects, overweight human, citric acid metabolism in, during total caloric fasting, 868 (Abst.)
Diagnosis, computer, nonindependence of symptoms and conditional probability approach to, 858 (Abst.)
Diazoxide, ethacrynic acid, and hydrochlorothiazide, adrenocortical responses in humans to, 871 (Abst.)
Differential absorption method, simultaneous red cell and plasma volume determinations by, 142
Digitalis, sensitive radioimmunoassay for, 1002 (Abst.)
Dihydroxy primary bile acid pathway in cholesterol catabolism, predominance in liver cirrhosis; potential source of liver injury, 862 (Abst.)
o,o′-Dihydroxyazobenzene, automated fluorometric method for direct determination of magnesium in serum and urine with, on normal and uremic subjects, 701
Diisopropylfluorophosphate, tritium-labeled, platelet survival in rat as measured with, 233
Diodrast as measure of renal plasma flow in uremic and nonuremic patients, 1027 (Abst.)
Disaccharidase activity, intestinal, localization to repeating unit associated with microvillous plasma membrane, 883 (Abst.)
Disaccharidases, jejunal, rat, adenosine triphosphate, and fat transport, effects of neomycin and gluten on, 1006 (Abst.)
Disc electrophoresis, improved method, 838
human intervertebral, with age and disc herniation, changes in protein-polysaccharide fractions of nucleus pulposus from, 930
Distentions, pulsatile, of chest, 883 (Abst.)
Diuretics, age, renal disease, hypertension, and calcium, influence on antidiuretic responses to suboptimal infusions of vasopressin, 206
DNA labeling of bone marrow and leukemic blood leukocyte with tritiated thymidine; H^3 thymidine biochemistry in vitro, 566
synthesis, synchronous activation, in hypophysectomized rat cartilage by growth hormone, 357
DOCA-induced potassium deficiency, impairment of glucose tolerance and insulin release in dogs via, 866 (Abst.)
Doriden, glutethimide in blood, rapid chromatographic method for identification and estimation, 333
Dose, meaning of term in relationship to response, 995 (Abst.)
Drinkers, beer, cardiohepatic failure in, 1022 (Abst.)

Drug metabolism, disordered, suggested role, experimental and acute intermittent porphyria, 996 (Abst.)
Duodenum, human, acid neutralization in, 1028 (Abst.)

E

ECHO-11 virus, factors in susceptibility of volunteers to respiratory illness from, 1010 (Abst.)
Ecologic bursitis, specific and nonspecific therapy, 1008 (Abst.)
Electroencephalogram, effect of acute hyperammoniemia on, 195
Electroimmunodiffusion, micromethod for quantitation of proteins in unconcentrated biological fluids, 864 (Abst.)
Electrolyte and acid-base measurements during recovery from severe treadmill exercise, 865 (Abst.)
Electrolytes, blood gases, and hydrogen ion, serial measurement in forearm exercise and during recovery, 1004 (Abst.)
Electrophoresis, acrylamide, refinements, 842
disc, improved method, 838
Electrophysiologic aspects of postextrasystolic potentiation and mechanical alternans, 870 (Abst.)
Embryo cell, chick, toxicity and anti-Rous sarcoma virus activity, into human sera during processing, 694
chick, studies on factor(s) toxic to, in blood of human malignancy; bioassay of malignant, nonmalignant, and normal blood in chick embryo system, 588
Encephalomyelitis, allergic, experimental, cell transfer of, donor and recipient cell–nervous tissue interactions, 1003 (Abst.)
Endotoxin, bacterial, effect of neonatal thymectomy on, susceptibility to, 455
Enteric hormones, effects on insulin and glucagon secretion, 888 (Abst.)
Enterotoxin B antitoxin, staphylococcal, radiobioassay for, 678
Enteroviruses and reoviruses, effect of periodate oxidation on antibody forming capacities of, 1024 (Abst.)
Enzymatic determination of pyruvate, lactate, acetoacetate, and β-hydroxybutyrate levels in plasma, semiautomated fluorimetric method for, 340
Enzyme activity, citrate condensing of human arterial and venous tissue, 888 (Abst.)
hereditary quantitative variant of glucose-6-phosphate dehydrogenase characterized by increase in, 560
characterization of leukocyte glucose-6-phosphate dehydrogenase in normal and mutant human subjects, 552
erythrocytic, defect with hemolytic anemia, glyceraldehyde-3-phosphate dehydrogenase deficiency, 879 (Abst.)
Enzyme—Cont'd
urinary, source, 1014 (Abst.)
Epidemiological and serological study of *E. coli* 04:H5 colonization in premature nursery, 855 (Abst.)
Epidemiology of leukemia in Olmstead County, Minnesota, 1935 through 1964, 891 (Abst.)
Epinephrine and 3′, 5′-cyclic AMP, with activation of myocardial lipase, 890 (Abst.)
Epithelium, colon, protein biosynthesis in, studies in whole tissue and cell-free systems of rodent and man, 859 (Abst.)
Erythroblast denucleation, studies of mechanism, 853 (Abst.)
Erythrocyte(s), abnormal rheological properties in Hb CC disease, 999 (Abst.)
human, sodium-potassium transport system of, temperature dependence of, 1028 (Abst.)
normal, effects of reduced glutathione on, clues to corpuscular defect in paroxysmal nocturnal hemoglobinuria, 997 (Abst.)
stromal proteins in Tay-Sachs disease, 855 (Abst.)
Erythrocytic enzyme defect with hemolytic anemia, glyceraldehyde-3-phosphate dehydrogenase deficiency, 879 (Abst.)
Erythrocytosis, renal, experimental, relationship between degree of hydronephrotic pressure and production of erythrocytosis, 740
Erythroid cells, nonnucleated, determination of ribosenucleic acid in, 833
Erythromelalgia, familial, genetic and physiologic observations, 861 (Abst.)
Erythropoietic cells labeled with Fe^{55} or Fe^{59}, improved method for radioautography, 523
stimulating factor, studies on, in plasma of mice after receiving testosterone, 947
Erythropoietin, decreased responsiveness of hematopoietic tissue to, in uremic rats, 411
and renin activity in plasma, experimental and clinical dissociation, 858 (Abst.)
timed doses of, effect on development of hematopoietic tissue, 1002 (Abst.)
Escherichia coli 04:H5 colonization in premature nursery, epidemiological and serological study, 855 (Abst.)
Esterase, C′1, serum inhibitor of, in health and disease, 369
Estrogens, effect on disposition of proline, hydroxyproline, and tyrosine in man, 886 (Abst.)
Ethacrynic acid enhanced bromuresis, comparison with peritoneal and hemodialysis, 913
furosemide and, differences in acute effects in man, 1021 (Abst.)

Ethacrynic acid—Cont'd
hydrochlorothiazide, and diazoxide, adrenocortical responses in humans to, 871 (Abst.)
Ethyl p-chlorophenoxyisobutyrate, changes in microbodies induced by, 854 (Abst.)
Ethylenediaminetetraacetate and citrate, effects upon ATP/ADP ratio of human platelets, 1009 (Abst.)
Etiocholanolone, dehydroepiandrosterone, and urinary androsterone, determination in normal male rhesus monkey, 981
Exercise, forearm, and during recovery, serial measurement of electrolytes, blood gases, and hydrogen ion in, 1004 (Abst.)
Exogenous reinfection as factor in pathogenesis of chronic tuberculosis, evidence against, 1020 (Abst.)
Extracorporeal transplantation of human kidney, 892 (Abst.)
Extravagal effect of ouabain, absence on normal A-V nodal function, 862 (Abst.)

F

Fabry's syndrome: report of kindred, 856 (Abst.)
Factor VIII, biochemical properties of human AHF separated from fibrinogen with manganous chloride and thrombin, 803
Familial hypercholesterolemia, effect of cholestyramine administration on serum lipids and nitrogen balance in, 12
Fat transport, jejunal disaccharidases, adenosine triphosphate and, effects of neomycin and gluten on, 1006 (Abst.)
Fatty acids, free, serum, and thrombosis, necropsy study, 1025 (Abst.)
Fe^{55} or Fe^{59}, improved method for radioautography, erythropoietic cells labeled with, 523
Fibrinogen, biochemical properties of human AHF (Factor VIII) separated from, with manganous chloride and thrombin, 803
deficiencies, congenital, aggregation, adhesion, and viscous metamorphosis of platelets in, 21
plasma, and coagulation function, effect of plasma proteolysis ("fibrinolysis") on, 853 (Abst.)
proteolysis by plasmin, identification of thrombin-clottable fibrinogen derivatives which polymerize abnormally, 780
"Fibrinolysis" (plasma proteolysis), effect on plasma fibrinogen and coagulation function, 853 (Abst.)
Fibroma virus, Shope, comparison of several assay procedures for, 882 (Abst.)
Fluorimetric method, semiautomated, for enzymatic determination of pyruvate, lactate, acetoacetate, and β-hydroxybutyrate levels in plasma, 340
Fluorometric method, automated for direct determination of magnesium in serum and urine using o,o'-dihydroxyazobenzene, on normal and uremic subjects, 701
5-Fluorouracil, immunosuppression and tumor stimulation in mice with, 992 (Abst.)
Follicle stimulating hormone, human, radioimmunoassay for, 872 (Abst.)
Forearm exercise and during recovery, serial measurement of electrolytes, blood gases, and hydrogen ion in, 1004 (Abst.)
Furosemide and ethacrynic acid, differences in acute effects in man, 1021 (Abst.)
in renal insufficiency, studies on action, 878 (Abst.)

G

Galactose-1-phosphate uridyl transferase deficiency, genetics, 646
Galactosemia, simple spot screening test for, 137
Gallbladder bile, human, surface tension and chemical composition, 1023 (Abst.)
Gallstones, bile acid composition, from man, 186
Gamma G globulin and gamma G related fragments, stability, in normal human urine, 445
globulin, determination in cerebrospinal fluid by quantitative chromatography, 120
Gases, blood, electrolytes, and hydrogen ion, serial measurement in forearm exercise and during recovery, 1004 (Abst.)
inspired foreign, distribution, 993 (Abst.)
Gastric mucosal coating and gastric emptying time of antacids, gastrocamera study, 999 (Abst.)
Gastrocamera study, gastric mucosal coating and gastric emptying time of antacids, 999 (Abst.)
Genetic defect or loss of immunologic control, familial occurrence of M-components, 871 (Abst.)
of galactose-1-phosphate uridyl transferase deficiency, 646
Globin, deer, formation by rabbit reticulocyte ribosomes, directed protein synthesis with messenger ribonucleoprotein, 1026 (Abst.)
Globulin, gamma, determination in cerebrospinal fluid by quantitative chromatography, 120
G, and gamma G related fragments, stability, in normal human urine, 445

Glomerular filtration rate and proximal tubular sodium, potassium, and water reabsorption, 713
Glucagon and insulin secretion, effects of enteric hormones on, 888 (Abst.)
Glucose, hypertonic, lactic acidemia induced in rabbits by infusions, 852 (Abst.)
ingestion, changes in oxidative metabolism with, 250
metabolism, autoregulation in isolated perfused rat liver, 997 (Abst.)
-6-phosphate, D-, rapid screening for, NADP oxidoreductase deficiency with methylene blue, 156
dehydrogenase, hereditary quantitative variant, characterized by increase in enzyme activity, 560
leukocyte, characterization in normal and mutant human subjects, 552
and 6-phosphogluconate dehydrogenase, assay in red cells, 149
sucrose, and lactose, effects on activities of intestinal lactase and sucrase, 884 (Abst.)
tolerance and insulin release, impairment in dogs via DOCA-induced potassium deficiency, 866 (Abst.)
Gluthione, reduced, effects on normal R.B.C., clues to corpuscular defect in paroxysmal nocturnal hemoglobinuria, 997 (Abst.)
Gluten, neomycin and, effect on rat jejunal disaccharidases, adenosine triphosphate, and fat transport, 1006 (Abst.)
Glutethimide (Doriden) in blood, rapid chromatographic method for identification and estimation, 333
Glyceraldehyde-3-phosphate dehydrogenase deficiency, erythrocytic enzyme defect with hemolytic anemia, 879 (Abst.)
Glycogen, new and automated technique for determination, 131
storage disease, hepatorenal, pathogenesis and treatment of gouty arthritis associated with, 1007 (Abst.)
hyperlipidemia in, 769
Gouty arthritis, acute, mechanism of inflammation, activation of permeability factor activity in synovial fluid by urate crystals, 887 (Abst.)
associated with hepatorenal glycogen storage disease, pathogenesis and treatment, 1007 (Abst.)
Granulocyte label in dog, evaluation of radiosulfate as, 47
Growth hormone, human, of insulin secretion induced by aminoacids, augmentation by, 874
paradoxical, response in exercising acromegalic subjects, 991 (Abst.)
secretion in patients with breast cancer, 1011 (Abst.)

H

H^3 thymidine biochemistry in vitro; DNA labeling of bone marrow and leukemic blood leukocytes with tritiated thymidine, 566
Hageman factor deficiency as cause of Hageman trait, immunologic evidence, 1017 (Abst.)
trait, immunologic evidence of deficiency of Hageman factor as cause, 1017 (Abst.)
Hair, zinc levels in, analysis, for diagnosis of zinc deficiency in man, 244
Heart disease, coronary, premature, serum insulin, carbohydrate, and lipid abnormalities in patients with, 1025 (Abst.)
valvular, and cardiac prostheses, blood destruction during exercise as prototype of anemias associated with, 860 (Abst.)
Hemagglutination, passive, as measured by serum antibody activity in patients with histoplasmosis, 881 (Abst.)
Hemagglutinin synthesis by Cytoxan, inhibition, specificity and drug-induced "tolerance," 103
Hematopoietic tissue, decreased responsiveness, to erythropoietin in uremic rats, 411
development of, effect of timed doses of erythropoietin on, 1002 (Abst.)
Heme and RNA synthesis, in bone marrow cultures, chloramphenicol on, 400
Hemodialysis, peritoneal and, comparison with, ethacrynic acid enhanced bromuresis, 913
Hemodynamic effects of vasopressin, systemic and coronary, 867 (Abst.)
response to respiratory tract infections, studies of total and peripheral blood flow, 57
Hemoglobin CC disease, abnormal rheological properties of erythrocytes in, 999 (Abst.)
I in American Negro family, structural and hematologic studies, 940
-iron, polymerization and intraluminal factors in absorption, 659
Hemoglobinuria, paroxysmal nocturnal, clues to corpuscular defect in, effects of reduced glutathione on normal R.B.C., 997 (Abst.)
Hemolysin, alpha, effect of antibiotics on production, by *Staphylococcus aureus*, 890 (Abst.)
Hemolysis or hemorrhage, integrity of stomach as requirement for maximal iron absorption after, 1000 (Abst.)
and role, effect of small amounts of vitamin B_{12} on, in remission in pernicious anemia, 879 (Abst.)
Hemolytic anemia, erythrocytic enzyme defect with, glyceraldehyde-3-phosphate dehydrogenase deficiency, 879 (Abst.)

Hemorrhage, effects of isoproterenol on distribution of peripheral blood flow before and after, 870 (Abst.)
evidence for two independent neural pathways mediating adrenocortical response to, 876 (Abst.)
or hemolysis, integrity of stomach as requirement for maximal iron absorption after, 1000 (Abst.)
Hemostasis, spectrum of von Willebrand's disease, 859 (Abst.)
Hepatic uptake test, double label, rapid quantitative method for measuring intestinal absorption of vitamin B_{12} in man using, 163
Hepatorenal glycogen storage disease, pathogenesis and treatment of gouty arthritis associated with, 1007 (Abst.)
Herniation, disc, and human intervertebral disc with age, changes in protein-polysaccharide fractions of nucleus pulposus from, 930
Heterologous carrier, homologous and, effect on clearance of colloidal material by reticuloendothelial system, 286
Histoplasmosis as measured by passive hemagglutination, serum antibody activity in patients with, 881 (Abst.)
Hodgkin's disease, serologic reactivity to Bedsonia agent in, 1019 (Abst.)
Homologous and heterologous carrier, effect on clearance of colloidal material by reticuloendothelial system, 286
Hormone(s), enteric, effects on insulin and glucagon secretion, 888 (Abst.)
growth, paradoxical, response in exercising acromegalic subjects, 991 (Abst.)
secretion in patients with breast cancer, 1011 (Abst.)
synchronous activation of DNA synthesis in hypophysectomized rat cartilage by, 357
human follicle stimulating radioimmunoassay for, 872 (Abst.)
growth, of insulin secretion induced by amino acids, augmentation by, 874
Hydrocarbons, saturated, accumulation in human spleens, 475
Hydrochlorothiazide, ethacrynic acid, and diazoxide, adrenocortical responses in humans to, 871 (Abst.)
Hydrocortisone, relative unresponsiveness of rheumatoid synovial cells to, abnormalities of connective tissue cells cultured from patients with rheumatoid arthritis, 300
Hydrogen ion, electrolytes, and blood gases, serial measurement in forearm exercise and during recovery, 1004 (Abst.)
peroxide toxicity, reversal in acatalasemic mouse by catalase administration, suggested model for possible replacement therapy of inborn errors of metabolism, 952
Hydronephrotic pressure and production of erythrocytosis, relationship between degree; experimental renal erythrocytosis, 740
β-Hydroxybutyrate, pyruvate, lactate, and acetoacetate levels in plasma, semiautomated fluorimetric method for enzymatic determination, 340
Hydroxyproline, proline, and tyrosine, effect of estrogens on disposition in man, 886 (Abst.)
Hyperammoniemia, acute, effect on electroencephalogram, 195
Hypercalcemia, hereditary, and parathyroid hyperplasia without definite hyperparathyroidism, 883 (Abst.)
Hypercapnia, chronic, pattern of compensatory response to, in patients with chronic obstructive pulmonary disease, 265
Hypercholesterolemia, familial, effect of cholestyramine administration on serum lipids and nitrogen balance in, 12
Hyperlipidemia in glycogen storage disease, 769
Hyperparathyroidism, definite, hereditary hypercalcemia and parathyroid hyperplasia without, 883 (Abst.)
Hyperphenylalanemia without phenylketonuria, 1001 (Abst.)
Hyperplasia, parathyroid, and hereditary hypercalcemia without definite hyperparathyroidism, 883 (Abst.)
Hypertension, age, renal disease, diuretics, and calcium, influence on antidiuretic responses to suboptimal infusions of vasopressin, 206
experimental, sodium balance in development, 867 (Abst.)
Hypertensive dogs, experimentally, peripheral vascular responses to potassium and magnesium in, 1003 (Abst.)
patients, interpretation of renin-aldosterone assay results in, 873 (Abst.)
Hypnosis, modification of ventilatory regulation by, 279
Hypoglycemia associated with neoplasia, role of certain tryptophan metabolites in, 1016 (Abst.)
Hypoperfusion, effects on lung surfactant, 863 (Abst.)
Hypophysectomy of rat cartilage, synchronous activation of DNA synthesis, by growth hormone, 357
Hypotension, orthostatic, autonomic defect in, 851 (Abst.)

I

I^{131}-labeled colloidal human serum albumin in study of reticuloendothelial system function, distribution of free and colloid-bound radioiodide, 972
Ileal bicarbonate secretion and dependency on intraluminal chloride, 882 (Abst.)

Ileum, everted proximal, of rat, movement of uric 2-^{14}C acid in, 1023 (Abst.)
Inclusions, synovial leukocyte, nonspecificity, 628
Indoleacetic acid, effect on plasma insulin of patient with diabetes mellitus, 998 (Abst.)
Infection, lower respiratory, effect on lung function in bronchiectasis, 863 (Abst.)
respiratory tract, hemodynamic response to, studies of total and peripheral blood flow, 57
staphylococcal, experimental, studies in normal and splenectomized monkeys, 1011 (Abst.)
varicella-zoster virus, activation, by immunosuppressive therapy, 463
Inflammation in canine joints, crystal induced; evidence against bradykinin as mediator of inflammation, 433
Inhibitor, serum, C'1-esterase in health and disease, 369
Insulin and glucagon secretion, effects of enteric hormones on, 888 (Abst.)
inhibitory activity, demonstration in serum of obese subjects, 998 (Abst.)
plasma, effect of indoleacetic acid on patients with diabetes mellitus, 998 (Abst.)
release and glucose tolerance, impairment in dogs via DOCA-induced potassium deficiency, 866 (Abst.)
secretion, effect of fasting upon, in rat, 995 (Abst.)
induced by amino acids, augmentation by human growth hormone, 874 (Abst.)
in man, intensive stimulation of, 1010 (Abst.)
serum, carbohydrate, and lipid abnormalities in patients with premature coronary heart disease, 1025 (Abst.)
Intervertebral disc, human, with age and disc herniation, changes in protein-polysaccharide fractions of nucleus pulposus from, 930
Intestinal absorption of trace quantities of chromium, 484
of vitamin B_{12} in man, rapid quantitative method for measuring, using double label hepatic uptake test, 163
disaccharidase activity, localization to repeating unit associated with microvillous plasma membrane, 883 (Abst.)
lactase and sucrase, effects of glucose, sucrose, and lactose on activities, 884 (Abst.)
secretion, small, and absorption of calcium in dog, role of intraluminal calcium compartments, 1013 (Abst.)
Intestine, intact human, potential difference during active and passive transport, 1018 (Abst.)
Intracardiac sound and pressure events in man: mitral stenosis, observations on delayed S_1 and S_2, opening snap interval, 1029 (Abst.)
Intraluminal chloride, ileal bicarbonate secretion and dependency on, 882 (Abst.)
factors and polymerization in absorption of hemoglobin-iron, 659
Intrapulmonary bacterial inactivation, method for quantitating in animals, 669
Immunoelectrophoretic studies in patients with cryofibrinogenemia, 70
Immunofluorescent staining, identification of rubella virus isolates by, and comparison of sensitivity of three cell culture systems for recovery of virus, 502
in laboratory diagnosis of Colorado tick fever, 923
Immunoglobulins, familial occurence of M-components, genetic defect or loss of immunologic control, 871 (Abst.)
and pathogenesis, unified proposal for evolution of antibody deficiency syndromes, 889 (Abst.)
thermolabile, two, comparative studies of, 1004 (Abst.)
Immunologic aspects of leukemia and radiation injury, 880 (Abst.)
control, loss, or genetic defect, familial occurence of M-components, 871 (Abst.)
evidence of deficiency of Hageman factor as cause of Hageman trait, 1017 (Abst.)
thrombocytopenia, another identifiable group, those treated successfully with plasmapheresis, 1015 (Abst.)
Immunosuppression and tumor stimulation in mice with 5-fluorouracil, 992 (Abst.)
Immunosuppressive therapy, on activation of varicella-zoster virus infections, 463
Iron absorption, factors affecting, in neonatal rats, 872 (Abst.)
-55 or iron-59, improved method for radioautography, erythropoietic cells labeled with, 523
hemoglobin-, polymerization and intraluminal factors in absorption, 659
maximal absorption, integrity of stomach as requirement for, after hemorrhage or hemolysis, 1000, (Abst.)
Isoenzymes, serum lactate dehydrogenase, alterations, during therapy directed at lung cancer, 314
Isolates, rubella virus, identification by immunofluorescent staining, and comparison of sensitivity of three cell culture systems for recovery of virus, 502

Isoproterenol, effects on distribution of peripheral blood flow before and after hemorrhage, 870 (Abst.)
Isozymes, serum lactic dehydrogenase, sex-related difference in, 865 (Abst.)

J

Jejunal disaccharidases, rat, adenosine triphosphate, and fat transport, effects of neomycin and gluten on, 1006 (Abst.)
Joints, canine, crystal induced inflammation in; evidence against bradykinin as mediator of inflammation, 433

K

Kappa chains, dependence of cold agglutinin activity on presence, 868 (Abst.)
Kidney function, urinary procoagulant, 886 (Abst.)
  human, extracorporeal transplantation, 892 (Abst.)
Kinase, creatine, activity, simple rapid colorimetric method for determination, 324
Korotkoff sounds, delay in left bundle branch block, 993 (Abst.)

L

L-chain components, low molecular weight, related to Bence-Jones proteins, 81
Lactate, pyruvate, acetoacetate, and β-hydroxybutyrate levels in plasma, semiautomated fluorimetric method for enzymatic determination, 340
  serum, dehydrogenase isoenzymes, alterations, during therapy directed at lung cancer, 314
Lactic acidemia induced in rabbits by infusions of hypertonic glucose, 852 (Abst.)
  dehydrogenase, serum, isozymes, sex-related difference in, 865 (Abst.)
Lactogen, human placental, studies of acute metabolic effects and disposition in normal man, 856 (Abst.)
Lactose, glucose, and sucrose, effects on activities of intestinal lactase and sucrase, 884 (Abst.)
Lecithin, studies on importance, for cholesterol solubilization in bile, 90
Leukemia, epidemiology in Olmstead County, Minnesota, 1935 through 1964, 891 (Abst.)
  pre-, chromosome abnormalities in, 1009 (Abst.)
  and radiation injury, immunologic aspects, 880 (Abst.)
Leukemic cell populations, cause of variation in proliferative activity of, 1012 (Abst.)
Leukocyte(s) glucose-6-phosphate dehydrogenase, characterization in normal and mutant human subjects, 552
  human, isolation and characterization of RNA from, 33
Leukocyte(s)—Cont'd
  inclusions, synovial, nonspecificity, 628
  leukemic blood, and bone marrow, DNA labeling with tritiated thymidine; H^3 thymidine biochemistry in vitro, 566
  production and release, mechanisms; factors influencing leukocyte release from isolated perfused rat spleen with reference to vasoactive agents, 577
Lidoflazine (R 7904), enhancement of coronary vasodilator action of ATP and adenosine after, 852 (Abst.)
Lipase, myocardial, activation by epinephrine and 3′, 5′-cyclic AMP, 890 (Abst.)
Lipid, serum insulin, and carbohydrate abnormalities in patients with premature coronary heart disease, 1025 (Abst.)
  and on nitrogen balance in familial hypercholesterolemia, effect of cholestyramine administration on, 12
Lipolytic activity, studies on human serum and pituitary fractions, 861 (Abst.)
Lipoprotein variations, plasma, and aortic cholesterol in cholesterol-fed cockerels, 885 (Abst.)
Liver, circulating thrombogenic procoagulants and, 1026 (Abst.)
  cirrhosis, predominance of dihydroxy primary bile acid pathway in cholesterol catabolism in; potential source of liver injury, 862 (Abst.)
  human, role in regulation of thrombolytic activity, 854 (Abst.)
  isolated perfused rat, autoregulation of glucose metabolism in, 997 (Abst.)
  rat, isolated with synthesis of vitamin K-dependent coagulation factors, 887 (Abst.)
  regeneration in tumor bearing mice, 1024 (Abst.)
Lung, bacterial clearance mechanisms, effect of acute renal failure on, 531
  disease, chronic obstructive thoracic compliance in, 427
  function in bronchiectasis, effect of lower respiratory infection on, 863 (Abst.)
  surfactant, effects of hypoperfusion on, 863 (Abst.)

M

M-components, familial occurrence, genetic defect or loss of immunologic control, 871 (Abst.)
Magnesium deficiency, influence on availability and utilization of thiamine, 1029 (Abst.)
  and potassium, peripheral vascular responses to, in experimentally hypertensive dogs, 1003 (Abst.)

Magnesium—Cont'd
in serum and urine, automated fluorometric method for direct determination, using o,o'-dihydroxyazobenzene, on normal and uremic subjects, 701
Malaria parasite cultivation and study of blood storage incubation of blood at 37° C. for, 881 (Abst.)
Malignancy, human, studies on factor(s) toxic to chick embryos in blood; bioassay of malignant, nonmalignant, and normal blood in chick embryo system, 588
Manganous chloride and thrombin, biochemical properties of human AHF (Factor VIII) separated from fibrinogen with, 803
Marfan syndrome, mechanics of breathing in, 864 (Abst.)
Marrow, bone, and leukemic blood leukocytes, DNA labeling with tritiated thymidine; H^3 thymidine biochemistry in vitro, 566
cultures, bone, effect of chloramphenicol on RNA and heme synthesis in, 400
Metabolic effects, acute, and disposition in normal man, studies of human placental lactogen, 856 (Abst.)
Metabolism, calcium, effect of treatment of acidosis of chronic renal disease on, 994 (Abst.)
citric acid, in overweight human diabetic and nondiabetic subjects during total caloric fasting, 868 (Abst.)
disorder drug, suggested role, experimental and acute intermittent porphyria, 996 (Abst.)
glucose, autoregulation in isolated perfused rat liver, 997 (Abst.)
oxidative, changes in, with glucose ingestion, 250
oxygen, coronary circulation, and myocardial contractility, effects of synthetic vasopressin on, 1000 (Abst.)
ribonucleic acid, during primary antibody response, 991 (Abst.)
suggested model for possible replacement therapy of inborn errors, reversal of H_2O_2 toxicity in acatalasemic mouse by catalase administration, 952
Metabolites, tryptophan, role in hypoglycemia associated with neoplasia, 1016 (Abst.)
Metamorphosis, aggregation, adhesion, and viscous, of platelets in congenital fibrinogen deficiencies, 21
Methionine Se^{75}-uptake in circulating blood cells and plasma proteins, 1005 (Abst.)
N-Methylated neomycin and basic antibiotics, cholesterol-lowering effects, 753
Methylene blue, NADP oxidoreductase deficiency with, rapid screening for D-glucose-6-phosphate, 156
Microbodies, changes in, induced by ethyl p-chlorophenoxyisobutyrate, 854 (Abst.)
Microdiffusion determination of blood oxygen, 824
Micromethod for quantitation of proteins in unconcentrated biological fluids, electroimmunodiffusion, 864 (Abst.)
Microscope slide, apparatus for concentrating cells in suspension onto, 494
Microvillous plasma membrane, localization of intestinal disaccharidase activity to repeating unit associated with, 883 (Abst.)
Minot-von Willebrand syndrome, 1008 (Abst.)
Mitral stenosis, observations on delayed S_1 and S_2, opening snap interval, intracardiac sound and pressure events in man, 1029 (Abst.)
Molecular weight, low L-chain components related to Bence-Jones proteins, 81
Mononucleosis, infectious, transient cryoglobulinemia in, 885 (Abst.)
Mucopolysaccharide, nondialyzable urinary, excretion in rheumatic and other systemic disease states, 617
Mucosal coating, gastric, and gastric emptying time of antacids, gastrocamera study, 999 (Abst.)
Muscle and thymus, autoimmunity to, in myasthenia gravis, 851 (Abst.)
Myasthenia gravis, autoimmunity to muscle and thymus in, 851 (Abst.)
Myocardial contractility, coronary circulation, and oxygen metabolism, effects of synthetic vasopressin on, 1000 (Abst.)
lipase, activation by epinephrine and 3', 5'-cyclic AMP, 890 (Abst.)
Myocardium of resperpinized dogs, distribution of norepinephrine-H^3 determined by autoradiography, 867 (Abst.)
Myxedema, study of blood–cerebrospinal fluid barrier in, 1012 (Abst.)

N

NADP oxidoreductase deficiency with methylene blue, rapid screening for D-glucose-6-phosphate, 156
Neomycin and gluten, effects on rat jejunal disaccharidases, adenosine triphosphate, and fat transport, 1006 (Abst.)
N-methylated, and basic antibiotics, cholesterol-lowering effects, 753
Neonatal rats, iron absorption in, factors affecting, 872 (Abst.)
thymectomy, effect on susceptibility to bacterial endotoxin, 455
Neonatally thymectomized mice, reconstitution with nonlymphoid thymic tumor, 1022 (Abst.)
Neoplasia, hypoglycemia associated with, role of certain tryptophan metabolites in, 1016 (Abst.)

Nephritis, experimental autoimmune, in sheep, further evidence for autoantibodies as mediators, 1021 (Abst.)
Nephron function, individual, in experimental bilateral pyelonephritis; distal tubular sodium and water reabsorption and concentrating defect, 728
glomerular filtration rate and proximal tubular sodium, potassium, and water reabsorption, 713
Nephropathy, familial, clinodactyly, and short stature, study of kindred, 876 (Abst.)
Nervous tissue and donor and recipient cell interactions, 1003 (Abst.)
Neural pathways, two independent, evidence for mediating adrenocortical response to hemorrhage, 876 (Abst.)
Nitrogen balance, on serum lipids and, in familial hypercholesterolemia effect of cholestyramine administration on, 12
Nodal function, normal A-V, absence of extravagal effect of ouabain on, 862 (Abst.)
Norepinephrine-H^3, distribution in myocardium of reserpinized dogs determined by autoradiography, 867 (Abst.)
Nucleotides, reduced pyridine, effect of primaquine and acetylphenylhydrazine on enzymatic and nonenzymatic oxidation, 1
Nucleus pulposus, changes in protein-polysaccharide fractions from human intervertebral disc with age and disc herniation, 930
Nursery, premature, epidemiological and serological study of *E. coli* 04:H5 in, 855 (Abst.)

O

Opening snap interval, observations on delayed S_1 and S_2, in mitral stenosis, 1029 (Abst.)
Organs, internal, and skin, potential differences between, method for identifying tissues and internal organs by needle biopsies in cat, 418
Orthostatic hypotension, autonomic defect in, 851 (Abst.)
Osteoporosis, 21 cases, cortical bone dynamics measured by tetracycline labeling in, 599
Ouabain on normal A-V nodal function, absence of extravagal effect, 862 (Abst.)
Oxidation, enzymatic and nonenzymatic, effect of primaquine and acetylphenylhydrazine on, reduced pyridine nucleotides, 1
periodate, effect on antibody forming capacities of enteroviruses and reoviruses, 1024 (Abst.)
Oxidative metabolism with glucose ingestion, changes in, 250
Oxidoreductase, NADP, deficiency with methylene blue, rapid screening for D-glucose-6-phosphate, 156
Oxygen and blood flow, effect on left ventricular contractile force, 869 (Abst.)
microdiffusion determination, 824
metabolism, coronary circulation, and myocardial contractility, effects of synthetic vasopressin on, 1000 (Abst.)
tension, blood, bedside determination, 686

P

Parasite, malaria, cultivation and study of blood storage, incubation of blood at 37° C. for, 881 (Abst.)
Parathyroid hyperplasia and hereditary hypercalcemia without definite hyperparathyroidism, 883 (Abst.)
Pathogenesis and immunoglobulins, unified proposal for evolution of antibody deficiency syndromes, 889 (Abst.)
Periodate oxidation, effect on antibody forming capacities of enteroviruses and reoviruses, 1024 (Abst.)
Peripheral and total blood flow, studies, hemodynamic response to respiratory tract infections, 57
vascular responses to potassium and magnesium in experimentally hypertensive dogs, 1003 (Abst.)
Peritoneal and hemodialysis, comparison with, ethacrynic acid enhanced bromuresis, 913
Pernicious anemia, effect of small amounts of vitamin B_{12} on hemolysis and role in remission in, 879 (Abst.)
Phagocytosis, biologic activity of rabbit antibody fragments in, 1005 (Abst.)
Phenylketonuria, hyperphenylalanemia without, 1001 (Abst.)
Phosphate, galactose-1-, uridyl transferase deficiency, genetics, 646
glucose-6-, dehydrogenase, hereditary quantitative variant, characterized by increase in enzyme activity, 560
glyceraldehyde-3-, dehydrogenase deficiency, erythrocytic enzyme defect with hemolytic anemia, 879 (Abst.)
leukocyte glucose-6-, dehydrogenase, characterization in normal and mutant human subjects, 552
6-Phosphogluconate dehydrogenase and glucose-6-phosphate dehydrogenase, assay in red cells, 149
Phosphokinase, creatine, cysteine-stimulated serum, 636
Pituitary fractions and human serum, studies on lipolytic activity, 861 (Abst.)
Placental lactogen, human, studies of acute metabolic effect and disposition in normal man, 856 (Abst.)
Plasma, erythropoietin and renin activity in, experimental and clinical dissociation, 858 (Abst.)

Plasma—Cont'd
insulin of patients with diabetes mellitus, effect of indoleacetic acid on, 998 (Abst.)
lipoprotein variations and aortic cholesterol in cholesterol-fed cockerels, 885 (Abst.)
membrane, microvillous, localization of intestinal disaccharidase activity to repeating unit associated with, 883 (Abst.)
of mice after receiving testosterone, studies on erythropoietic stimulating factor in, 947
proteins, circulating blood cells and, methionine Se^{75} -uptake in, 1005 (Abst.)
proteolysis ("fibrinolysis") effect on plasma fibrinogen and coagulation function, 853 (Abst.)
renal, flow, Diodrast as measure of, in uremic and nonuremic patients, 1027 (Abst.)
renin activity, influence of potassium on, in adrenalectomized dogs, 874 (Abst.)
semiautomated fluorimetric method for enzymatic determination of pyruvate, lactate, acetoacetate, and β-hydroxybutyrate levels in, 340
tests, 8 hour, and urinary excretion, comparison for vitamin B_{12} absorption, 966
volume, simultaneous red cell and, determinations by differential absorption method, 142
Plasmapheresis, successful treatment with, another identifiable group of immunologic thrombocytopenia, 1015 (Abst.)
Plasmin, proteolysis of fibrinogen by, identification of thrombin-clottable fibrinogen derivatives which polymerize abnormally, 780
Platelet(s) adhesiveness, measurement with collagen coated beads, 873 (Abst.)
aggregation, adhesion, and viscous metamorphosis, in congenital fibrinogen deficiencies, 21
blood, coumarin on, studies on effect, 383
human, ATP/ADP ratio of, effects of ethylenediaminetetraacetate and citrate upon, 1009 (Abst.)
survival in rat as measured with tritium-labeled diisopropylfluorophosphate, 233
with transfusion-induced thrombocytosis, 813
Polymerization and intraluminal factors in absorption of hemoglobin-iron, 659
Polysaccharide, protein-, factions, changes in nucleus pulposus from human intervertebral disc with age and disc herniation, 930
Porphria, acute intermittent, and experimental, suggested role of disordered drug metabolism, 996 (Abst.)
Postoperative evaluation of aortic Starr Edwards valves, pitfalls in, 1015 (Abst.)
Potassium deficiency, via DOCA-induced, impairment of glucose tolerance and insulin release, 866 (Abst.)
influence on plasma renin activity in adrenalectomized dogs, 874 (Abst.)
and magnesium, peripheral vascular responses to, in experimentally hypertensive dogs, 1003 (Abst.)
proximal tubular sodium, and water reabsorption, and glomerular filtration rate, 713
Preleukemia, chromosome abnormalities in, 1009 (Abst.)
Pressure events, intracardiac sound and, in man, mitral stenosis, observations on delayed S_1 and S_2, opening snap interval, 1029 (Abst.)
Primaquine and acetylphenylhydrazine, effect on enzymatic and nonenzymatic oxidation of reduced pyridine nucleotides, 1
Procoagulant, urinary, and kidney function, 886 (Abst.)
circulating thrombogenic, and liver, 1026 (Abst.)
Proline, hydroxyproline, and tyrosine, effect of estrogens on disposition in man, 866 (Abst.)
Prostheses, cardiac, and valvular heart disease, blood destruction during exercise as prototype of anemias associated with, 860 (Abst.)
Protein(s), Bence-Jones, low molecular weight L-chain components related to, 81
biosynthesis in colon epithelium studies in whole tissue and cell-free systems of rodent and man, 859 (Abst.)
micromethod for quantitation in unconcentrated biological fluids, electroimmunodiffusion, 864 (Abst.)
plasma, circulating blood cells and, methionine Se^{75}-uptake in, 1005 (Abst.)
-polysaccharide fractions, changes in nucleus pulposus from human intervertebral disc with age and disc herniation, 930
stromal, red blood cell, in Tay-Sachs disease, 855 (Abst.)
synthesis, directed, with messenger ribonucleoprotein: formation of deer globin by rabbit reticulocyte ribosomes, 1026 (Abst.)
Proteolysis of fibrinogen by plasmin, identification of thrombin-clottable fibrinogen derivatives which polymerize abnormally, 780
plasma, ("fibrinolysis"), effect on plasma fibrinogen and coagulation function, 853 (Abst.)
Protoplast, and bacterial forms of *Streptococcus faecalis*, effects of antibiotics on, 543

Pulmonary disease, chronic obstructive, pattern of compensatory response to chronic hypercapnia in patients with, 265
upper extremity total and forearm blood flow in patients with, studies during carbon dioxide retention and adrenergic blockade, 992 (Abst.)
surfactant, source, nonciliated bronchiolar cell, 1001 (Abst.)
Pulposus, nucleus, changes in protein-polysaccharide fractions from human intervertebral disc with age and disc herniation, 930
Pyelonephritis, bilateral, experimental, individual nephron function in; distal tubular sodium and water reabsorption and concentrating defect, 728
glomerular filtration rate and proximal tubular sodium, potassium and water reabsorption, 713
Pyridine nucleotides, reduced, effect of primaquine and acetylphenylhydrazine on enzymatic and nonenzymatic oxidation, 1
Pyruvate, lactate, acetoacetate, and β-hydroxybutyrate levels in plasma, semiautomated fluorimetric method for enzymatic determination, 340

R

Radiation and leukemia injury, immunologic aspects, 880 (Abst.)
Radioautography of erythropoietic cells labeled with Fe^{55} or Fe^{59}, improved method for, 523
Radiobioassay for staphylococcal enterotoxin B antitoxin, 678
Radioimmunoassay for human follicle stimulating hormone, 872 (Abst.)
sensitive, for digitalis, 1002 (Abst.)
Radioiodide, free and colloid-bound, distribution, I^{131}-labeled colloidal human serum albumin in study of reticuloendothelial system function, 972
Radioisotopic assay of serum vitamin B_{12} with DEAE cellulose, 510
Radiosulfate as granulocyte label in dog, evaluation, 47
$Rb^{84}Cl$, single slug injection of, coronary blood flow measurements in humans with coincidence counting system and, 1018 (Abst.)
Red blood cell, normal, effects of reduced glutathione on, clues to corpuscular defect in paroxysmal nocturnal hemoglobinuria, 997 (Abst.)
stromal proteins in Tay-Sachs disease, 855 (Abst.)
cells, assay of glucose-6-phosphate dehydrogenase and 6-phosphogluconate dehydrogenase in, 149
Red cell—Cont'd
blood, normal, effects of reduced glutathione on, clues to corpuscular defect in paroxysmal nocturnal hemoglobinuria, 997 (Abst.)
simultaneous, and plasma volume determinations by differential absorption method, 142
Reinfection, exogenous, as factor in pathogenesis of chronic tuberculosis, evidence against, 1020 (Abst.)
Renal disease, age, hypertension, diuretics, and calcium, influence on antidiuretic responses to suboptimal infusions of vasopressin, 206
chronic effect of treatment of acidosis on calcium metabolism, 994 (Abst.)
erythrocytosis, experimental, relationship between degree of hydronephrotic pressure and production of erythrocytosis, 740
failure, acute, effect on bacterial clearance mechanisms of lung, 531
insufficiency, studies on action of furosemide in, 878 (Abst.)
plasma flow, Diodrast as measure of, in uremic and nonuremic patients, 1027 (Abst.)
Renin-aldosterone assay results, interpretation in hypertensive patients, 873 (Abst.)
and erythropoietin activity in plasma, experimenal and clinical dissociation, 858 (Abst.)
plasma, activity, influence of potassium on, in adrenalectomized dogs, 874 (Abst.)
Reoviruses, enteroviruses and, effect of periodate oxidation on antibody forming capacities of, 1024 (Abst.)
Reserpine in dogs, determined by autoradiography, distribution of norepinephrine-H^3, 867 (Abst.)
Respiration, Cheyne-Stokes, cardiac arrhythmias caused by cardiorespiratory interaction in, 891 (Abst.)
Respiratory illness from ECHO-11 virus, factors in susceptibility of volunteers to, 1010 (Abst.)
infection, lower, effect on lung function in bronchiectasis, 863 (Abst.)
tract infections, hemodynamic response to, studies of total and peripheral blood flow, 57
Reticulocyte ribosomes, rabbit, formation of deer globin by, directed protein synthesis with messenger ribonucleoprotein, 1026 (Abst.)
Reticuloendothelial system, effect of homologous and heterologous carrier on clearance of colloidal material by, 286
function, I^{131}-labeled colloidal human serum albumin in study, distribution of free and colloid-bound radioiodide, 972

Rheological properties, abnormal, of erythrocytes in Hb CC disease, 999 (Abst.)
Rheumatic and other systemic disease states excretion of nondialyzable urinary mucopolysaccharide in, 617
Rheumatoid arthritis, abnormalities of connective tissue cells cultured from patients with, relative unresponsiveness of rheumatoid synovial cells to hydrocortisone, 300
synovial cells, relative unresponsiveness to hydrocortisone, abnormalities of connective tissue cells cultured from patients with rheumatoid arthritis, 300
Ribonucleic acid metabolism during primary antibody response, 991 (Abst.)
RNA, isolation and characterization, from human leukocytes, 33
Ribonucleoprotein, messenger, directed protein synthesis with, formation of deer globin by rabbit reticulocyte ribosomes, 1026 (Abst.)
Ribosenucleic acid, determination in nonnucleated erythroid cells, 833
Ribosomes, reticulocyte, rabbit, formation of deer globin by, directed protein synthesis with messenger ribonucleoprotein, 1026 (Abst.)
RNA and heme synthesis in bone marrow cultures, effect of chloramphenicol on, 400
isolation and characterization, from human leukocytes, 33
patterns in chloroleukemic cells, 1015 (Abst.)
Rous, anti-, sarcoma virus activity and chick embryo cell toxicity into human sera during processing, 694
Rubella virus isolates, identification by immunofluorescent staining, and a comparison of sensitivity of three cell culture systems for recovery of virus, 502

S

S_1 and S_2, opening snap interval, delayed, observation on, mitral stenosis, intracardiac sound and pressure events in man, 1029 (Abst.)
Salt, bile, turnover rates, estimation in normal subjects and patients with steroid wasting syndromes, 1019 (Abst.)
Sarcoma, virus, anti-Rous, activity, and chick embryo cell toxicity into human sera during processing, 694
Screening test, simple spot, for galactosemia, 137
Secretion, paradoxical, growth hormone in patients with breast cancer, 1011 (Abst.)
Seleno-methionine uptake in circulating blood cells and plasma proteins, 1005 (Abst.)
Sera, human, anti-Rous sarcoma virus activity and chick embryo cell toxicity into, during processing, 694
Serologic reactivity to Bedsonia agent in Hodgkin's disease, 1019 (Abst.)
Serological and epidemiological study of *E. coli* 04:H5 colonization in premature nursery, 855 (Abst.)
Serum albumin, human, I^{131}-labeled colloidal, in study of reticuloendothelial system function, distribution of free and colloid-bound radioiodide, 972
antibody activity in patients with histoplasmosis as measured by passive hemagglutination, 881 (Abst.)
ceruloplasmin levels in normal individuals, factors influencing, 893
cysteine-stimulated, creatine phosphokinase, 636
free fatty acids and thrombosis, necropsy study, 1025 (Abst.)
human, fractionation of vitamin B_{12} binders in, 958
and pituitary fractions, studies on lipolytic activity, 861 (Abst.)
inhibitor of C'1-esterase in health and disease, 369
insulin, carbohydrate, and lipid abnormalities in patients with premature coronary heart disease, 1025 (Abst.)
lactate dehydrogenase isoenzymes, alterations, during therapy directed at lung cancer, 314
lactic dehydrogenase isozymes, sex-related difference in, 865 (Abst.)
lipids and on nitrogen balance in familial hypercholesterolemia effect of cholestyramine administration on, 12
of obese subjects, demonstration of insulin inhibitory activity in, 998 (Abst.)
and urine, automated fluorometric method for direct determination of magnesium in, using o,o'-dihydroxyazobenzene, on normal and uremic subjects, 701
vitamin B_{12}, radioisotopic assay with DEAE cellulose, 510
Sex-related difference in serum lactic dehydrogenase isozymes, 865 (Abst.)
Shope fibroma virus, comparison of several assay procedures for, 882 (Abst.)
Skin and internal organs, potential differences between, method for identifying tissues and internal organs by needle biopsies in cat, 418
Slide centrifuge, apparatus for concentrating cells in suspension onto microscope slide, 494
Small intestinal secretion and absorption of calcium in dog, role of intraluminal calcium compartments, 1013 (Abst.)

Smoking, cold pressor test, and tilt, cardiovascular responses to, in nonsmokers and smokers, 995 (Abst.)
Sodium balance in development of experimental hypertension, 867 (Abst.)
distal tubular, and water reabsorption and concentrating defect, 728
excretion in uremic man, observations on control system regulating, 1017 (Abst.)
-potassium transport system of human erythrocytes, temperature dependence of, 1028 (Abst.)
proximal tubular, potassium, and water reabsorption, and glomerular filtration rate, 713
Spleen(s), human, accumulation of saturated hydrocarbons in, 475
isolated perfused rat, factors influencing leukocyte release from, with reference to vasoactive agents, 577
Splenectomized monkeys, normal and, studies on experimental staphylococcal infections in, 1011 (Abst.)
Staphylococcal infections, experimental, studies in normal and splenectomized monkeys, 1011 (Abst.)
enterotoxin B antitoxin, radiobioassay for, 678
Staphylococci, nasal and skin carriers, self-contamination of surgical wounds by, 1028 (Abst.)
Staphylococcus aureus, with alpha hemolysin, effect of antibiotics on production, 890 (Abst.)
Starr Edwards valves, aortic, pitfalls in postoperative evaluation, 1015 (Abst.)
Stenosis, mitral, observations on delayed S_1 and S_2, opening snap interval, intracardiac sound and pressure events in man, 1029 (Abst.)
Steroid wasting syndromes, estimation of bile salt turnover rates in normal subjects and patients with, 1019 (Abst.)
Stimulation, intensive, of insulin secretion in man, 1010 (Abst.)
Stomach, integrity as requirement for maximal iron absorption after hemorrhage or hemolysis, 1000 (Abst.)
Streptococcus faecalis, effects of antibiotics on protoplast and bacterial forms, 543
Stromal proteins, red blood cell, in Tay-Sachs disease, 855 (Abst.)
Subcellular disposition of uracil mustard in rat, 860 (Abst.)
Sucrose, glucose, and lactose, effects on activities of intestinal lactase and sucrase, 884 (Abst.)
Surface tension and chemical composition of human gallbladder bile, 1023 (Abst.)
Surfactant, lung, effects of hypoperfusion on, 863 (Abst.)
pulmonary, source, nonciliated bronchiolar cell, 1001 (Abst.)
Surgical wounds, self-contamination by nasal and skin carriers of staphylococci, 1028 (Abst.)
Susceptibility of volunteers to respiratory illness from ECHO-11 virus, factors in, 1010 (Abst.)
Syndromes, steroid wasting, estimation of bile salt turnover rates in normal subjects and patients with, 1019 (Abst.)
Synovial cells, rheumatoid, relative unresponsiveness to hydrocortisone, abnormalities of connective tissue cells cultured from patients with rheumatoid arthritis, 300
fluid, activation of permeability factor activity in, by urate crystals, mechanism of inflammation in acute gouty arthritis, 887 (Abst.)
leukocyte inclusions, nonspecificity, 628
Synthesis, DNA, synchronous activation, in hypophysectomized rat cartilage by growth hormone, 357
protein, directed, with messenger ribonucleoprotein: formation of deer globin by rabbit reticulocyte ribosomes, 1026 (Abst.)
Systemic and coronary hemodynamic effects of vasopressin, 867 (Abst.)
and rheumatic disease states, excretion of nondialyzable urinary mucopolysaccharide in, 617
Systole, atrial, in man, observations on effect, 224
Systolic, postextra-, potentiation and mechanical alternans, electrophysiologic aspects, 870 (Abst.)

T

Tay-Sachs disease, red blood cell stromal proteins in, 855 (Abst.)
Temperature dependence of sodium-potassium transport system of human erythrocytes, 1028 (Abst.)
Tension, blood oxygen, bedside determination, 686
surface, and chemical composition of human gallbladder bile, 1023 (Abst.)
Test, cold pressor, tilt, and smoking, cardiovascular responses to, in nonsmokers and smokers, 995 (Abst.)
double label, hepatic uptake, rapid quantitative method for measuring intestinal absorption of vitamin B_{12} in man using, 163
simple spot screening, for galactosemia, 137
T_3, coated charcoal, alternative to, desorption from coated charcoal, 113

Testosterone, effects on anemia of WWv mice, 875 (Abst.)
studies on erythropoietic stimulating factor in plasma of mice after receiving, 947
Tetracycline labeling, cortical bone dynamics measured by, in 21 cases of osteoporosis, 599
Thermolabile immunoglobulins, two, comparative studies of, 1004 (Abst.)
Thiamine, availability and utilization of, influence of magnesium deficiency on, 1029 (Abst.)
Thoracic compliance in chronic obstructive lung disease, 427
Thrombin-clottable fibrinogen derivatives which polymerize abnormally, identification, proteolysis of fibrinogen by plasmin, 780
and manganous chloride, biochemical properties of human AHF (Factor VIII) separated from fibrinogen with, 803
Thrombocytopenia, immunologic, another identifiable group, 1015 (Abst.)
Thrombocytopheresis, rapid and effective approach to symptomatic thrombocytosis, 389
Thrombocytosis, symptomatic, rapid and effective approach to, thrombocytopheresis, 389
transfusion-induced, platelet survival in rats with, 813
Thromboembolism, acute, urokinase in therapy, 871 (Abst.)
Thrombogenic procoagulants, circulating, and liver, 1026 (Abst.)
Thrombolytic activity, role of human liver in regulation, 854 (Abst.)
Thrombosis, serum free fatty acids and, necropsy study, 1025 (Abst.)
Thymectomized mice, neonatally, reconstitution with nonlymphoid thymic tumor, 1022 (Abst.)
Thymectomy, effect on susceptibility to bacterial endotoxin, 455
Thymic tumor, nonlymphoid, reconstitution of neonatally thymectomized mice with, 1022 (Abst.)
Thymidine, tritiated, DNA labeling of bone marrow and leukemic blood leukocytes with; H^3 thymidine biochemistry in vitro, 566
Thymus and muscle, autoimmunity to, in myasthenia gravis, 851 (Abst.)
Tick fever, Colorado, immunofluorescent staining in laboratory diagnosis, 923
Tissue(s), hematopoietic, decreased responsiveness, to erythropoietin in uremic rats, 411
development of, effect of timed doses of erythropoietin on, 1002 (Abst.)
human arterial and venous, citrate condensing enzyme activity, 888 (Abst.)
Tissue(s)—Cont'd
and internal organs, method for identifying, by needle biopsies in cat, potential differences between skin and internal organs, 418
whole, and cell-free systems, studies in rodent and man; protein biosynthesis in colon epithelium, 859 (Abst.)
Toxicity, chick embryo cell, and anti-Rous sarcoma virus activity, into human sera during processing, 694
Transferase, galactose-1-phosphate uridyl, deficiency, genetics, 646
Transfusion-induced thrombocytosis, platelet survival in rats with, 813
Transplantation, extracorporeal, of human kidney, 892 (Abst.)
Transport, active and passive, potential difference of intact human intestine during, 1018 (Abst.)
fat, rat jejunal disaccharidases and adenosine triphosphate, effects of neomycin and gluten on, 1006 (Abst.)
system, sodium-potassium, of human erythrocytes, temperature dependence of, 1028 (Abst.)
Tritium-labeled diisopropylfluorophosphate, platelet survival in rat as measured with, 233
Tryptophan metabolites, role in hypoglycemia associated with neoplasia, 1016 (Abst.)
Tuberculosis, chronic, pathogenesis, definitive evidence against exogenous reinfection as factor in, 1020 (Abst.)
Tubular sodium, distal, and water reabsorption and concentrating defect, 728
proximal, potassium, and water reabsorption, and glomerular filtration rate, 713
Tumor bearing mice, liver regeneration in, 1024 (Abst.)
and immunosuppression stimulation in mice with 5-fluorouracil, 992 (Abst.)
thymic, nonlymphoid, reconstitution of neonatally thymectomized mice with, 1022 (Abst.)
Tyrosine, proline, hydroxyproline, effect of estrogens on disposition in man, 886 (Abst.)

U

Uracil mustard, subcellular disposition in rat, 860 (Abst.)
Urate crystals, activation of permeability factor activity in synovial fluid by, mechanism of inflammation in acute gouty arthritis, 887 (Abst.)
induced inflammation in canine joints; evidence against bradykinin as mediator of inflammation, 433

Uremic man, observations on control system regulating sodium excretion in, 1017 (Abst.)
and nonuremic patients, Diodrast as measure of renal plasma flow in, 1027 (Abst.)
and normal subjects, studies on; automated fluorometric method for direct determination of magnesium in serum and urine using o,o′-dihydroxyazobenzene, 701
rats, decreased responsiveness of hematopoietic tissue to erythropoietin in, 411
Uric 2-^{14}C acid, movement in everted proximal ileum of rat, 1023 (Abst.)
Uridyl transferase deficiency, galactose-1-phosphate, genetics, 646
Urinary androsterone, etiocholanolone, and dehydroepiandrosterone, determination in normal male rhesus monkey, 981
enzymes, source, 1014 (Abst.)
excretion and 8 hour plasma tests, comparison for vitamin B_{12} absorption, 966
mucopolysaccharide, nondialyzable, excretion in rheumatic and other systemic disease states, 617
procoagulant and kidney function, 886 (Abst.)
Urine collector, low temperature, for unstable compounds, 173
normal human, stability of gamma G globulin and gamma G related fragments in, 445
and serum, automated fluorometric method for direct determination of magnesium in, using o,o′-dihydroxyazobenzene, on normal and uremic subjects, 701
Urokinase in therapy of acute thromboembolism, 871 (Abst.)

V

Varicella-zoster virus infections, activation, by immunosuppressive therapy, 463
Vascular responses, peripheral, to potassium and magnesium in experimentally hypertensive dogs, 1003 (Abst.)
Vasoactive agents, factors influencing leukocyte release from isolated perfused rat spleen with reference to, 577
Vasodilator, coronary, action of ATP and adenosine after Lidoflazine, enhancement, 852 (Abst.)
Vasopressin, suboptimal infusions, antidiuretic responses to, influence of age, renal disease, hypertension, diuretics, and calcium on, 206
synthetic, effects on coronary circulation, myocardial contractility, and oxygen metabolism, 1000 (Abst.)
Vasopressin—Cont'd
systemic and coronary hemodynamic effects, 867 (Abst.)
Venous and arterial tissue, human, citrate condensing enzyme activity, 888 (Abst.)
Ventilatory regulation by hypnosis, modification, 279
Ventricular contractile force, left, effect of oxygen and blood flow on, 869 (Abst.)
Virus, ECHO-11, respiratory illness from, factors in susceptibility of volunteers to, 1010 (Abst.)
rubella, isolates, identification by immunofluorescent staining, and comparison of sensitivity of three cell culture systems for recovery of virus, 502
Shope fibroma, comparison of several assay procedures for, 882 (Abst.)
Vitamin B_{12} absorption, comparison of urinary excretion and 8 hour plasma tests for, 966
binders, fractionation in human serum, 958
effect of small amounts on hemolysis and role in remission in pernicious anemia, 879 (Abst.)
in man, rapid quantitative method for measuring intestinal absorption, using double label hepatic uptake test, 163
serum, radioisotopic assay with DEAE cellulose, 510
K-dependent coagulation factors, synthesis by isolated rat liver, 887 (Abst.)

W

Wasting syndromes, steroid, estimation of bile salt turnover rates in normal subjects and patients with, 1019 (Abst.)
Water reabsorption and distal tubular sodium and concentrating defect, 728
proximal tubular sodium, and potassium, and glomerular filtration rate, 713
von Willebrand's disease, spectrum, 859 (Abst.)
-Minot syndrome, 1008 (Abst.)
Wilson's disease, factors influencing serum ceruloplasmin levels in normal individuals, 893
Wounds, surgical, self-contamination by nasal and skin carriers of staphylococci, 1028 (Abst.)

Z

Zinc deficiency in man, analysis of zinc levels in hair for diagnosis, 244
studies on, 1007 (Abst.)
levels in hair, analysis, for diagnosis of zinc deficiency in man, 244
